

THE  
QUARTERLY JOURNAL  
OF THE  
GEOLOGICAL SOCIETY OF LONDON.

EDITED BY  
THE ASSISTANT-SECRETARY OF THE GEOLOGICAL SOCIETY.

VOLUME THE TWELFTH.

1856.

---

PART THE FIRST.  
PROCEEDINGS OF THE GEOLOGICAL SOCIETY.

---

LONDON :  
LONGMAN, BROWN, GREEN, LONGMANS, AND ROBERTS.  
PARIS:—FRIED. KLINCKSIECK, 11 RUE DE LILLE; BAUDRY, 9 RUE DU COQ,  
PRES LE LOUVRE; LEIPZIG, T. O. WEIGEL.

SOLD ALSO AT THE APARTMENTS OF THE SOCIETY.

MDCCLVI.

**List**  
OF THE  
**OFFICERS**  
OF THE  
**GEOLOGICAL SOCIETY OF LONDON.**

~~~~~  
Elected February and June 1856.  
~~~~~

**President.**

Col. Portlock, R.E., F.R.S.

**Vice-Presidents.**

Sir P. De M. G. Egerton, Bart., M.P., F.R.S.  
R. A. Godwin-Austen, Esq., B.A., F.R.S.  
Sir Charles Lyell, F.R.S. and L.S.

**Secretaries.**

Robert W. Mylne, Esq.  
Warrington W. Smyth, Esq., M.A.

**Foreign Secretary.**

Samuel Peace Pratt, Esq., F.R.S. and L.S.

**Treasurer.**

Joseph Prestwich, Esq., F.R.S.

**COUNCIL.**

Prof. Thomas Bell, F.R.S. and L.S.	John Morris, Esq.
Col. P. T. Cautley, K.C.B., F.R.S. and L.S.	Sir R. I. Murchison, G.C.St.S., F.R.S. & L.S.
Earl of Ducie.	L.S.
Sir P. De M. G. Egerton, Bart., M.P., F.R.S.	R. W. Mylne, Esq.
H. Falconer, M.D., F.R.S.	S. R. Pattison, Esq.
Thomas F. Gibson, Esq.	Prof. John Phillips, F.R.S.
R. A. Godwin-Austen, Esq., B.A., F.R.S.	Col. Portlock, R.E., F.R.S.
William John Hamilton, Esq., F.R.S.	Joseph Prestwich, Esq., F.R.S.
William Hopkins, Esq., M.A., F.R.S.	Samuel Peace Pratt, Esq., F.R.S. & L.S.
Leonard Horner, Esq., F.R.S.L. & E.	Prof. A. C. Ramsay, F.R.S.
Sir Charles Lyell, F.R.S. & L.S.	Warrington W. Smyth, Esq., M.A.
John C. Moore, Esq., M.A.	Henry Clifton Sorby, Esq.

~~~~~  
**Assistant-Secretary, Curator, and Librarian.**

T. Rupert Jones, Esq.

## TABLE OF CONTENTS.

### PART I.—ORIGINAL COMMUNICATIONS.

|                                                                                                                                        | Page |
|----------------------------------------------------------------------------------------------------------------------------------------|------|
| ANSTED, Prof. D. T. Description of remarkable Mineral Veins: The Copper Lode of Santiago de Cuba .....                                 | 144  |
| BABBAGE, C., Esq. On the Action of Ocean-Currents in the formation of the Strata of the Earth. [Abstract.] .....                       | 366  |
| BANKS, R. W., Esq. On the Tilestones, or Downton Sandstones, in the neighbourhood of Kington, and their Contents. (With a Plate.)..... | 93   |
| BECKLES, S. H., Esq. On the Lowest Strata of the Cliffs at Hastings.                                                                   | 238  |
| BEDFORD, E. J., Commander R.N. Notice of some Raised Beaches in Argyllshire .....                                                      | 167  |
| BINNEY, E. W., Esq. On the Permian Character of some of the Red Sandstones and Breccias of the South of Scotland .....                 | 138  |
| — On some Footmarks in the Millstone Grit of Tintwistle, Cheshire .....                                                                | 350  |
| BOUÉ, M. AMI. On the Probable Origin of the English Channel by means of a Fissure. [Abstract.] .....                                   | 325  |
| BOWEN, H. G., Esq. On the Geology of Trinidad. [Abstract.] ..                                                                          | 389  |
| BUNBURY, C. J. F., Esq. Notice of some Appearances observed on draining a Mere near Wretham Hall, Norfolk. ....                        | 355  |
| CHARTERS, Major S. On a Section near Mont Blanc. ....                                                                                  | 385  |
| COBBOLD, Rev. R. H. On the Occurrence of Coal near the City of E-u in China .....                                                      | 358  |
| CROKER, Dr. J. G. On the Lignite-Deposits of Bovey Tracey, Devonshire. [Abstract.] .....                                               | 354  |
| DEGOUSSÉE and LAURENT, MM. On the Valenciennes Coal-Basin. (With a Plate.) .....                                                       | 252  |
| DENNIS, Rev. J. B. P. On some Organic Remains from the Bone-bed at the base of the Lias at Lyme Regis. [Abstract.] .....               | 252  |

|                                                                                                                                                                                                                                                                                                           | Page    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| DICK, A., Esq. Analysis of the Cleveland Iron-Ore from Eston ..                                                                                                                                                                                                                                           | 357     |
| GODWIN-AUSTEN, R., Esq. On the Newer Tertiary Deposits of the Sussex Coast. [Abstract.].....                                                                                                                                                                                                              | 4       |
| — On the Possible Extension of the Coal-Measures beneath the South-Eastern part of England. (With a Plate.) .....                                                                                                                                                                                         | 38, 46* |
| HARKNESS, Prof. R. On the Lowest Sedimentary Rocks of the South of Scotland .....                                                                                                                                                                                                                         | 238     |
| — On the Sandstones and Breccias of the South of Scotland of an Age subsequent to the Carboniferous Period .....                                                                                                                                                                                          | 254     |
| HAUGHTON, Rev. Prof. SAMUEL. Experimental Researches on the Granites of Ireland.....                                                                                                                                                                                                                      | 171     |
| HUXLEY, Prof. T. H. On the Structure and Affinities of Himanopterus .....                                                                                                                                                                                                                                 | 34      |
| IBBETSON, L. L. B., Esq. On the Possible Origin of Veins of Gold in Quartz and other Rocks. [Abstract.].....                                                                                                                                                                                              | 384     |
| MARTIN, P. J., Esq. On some Geological Features of the Country between the South Downs and the Sussex Coast .....                                                                                                                                                                                         | 134     |
| MILLER, W., Esq. Notice of the recent Eruption of Mauna Loa in Hawaii, Sandwich Islands. [Abstract.] .....                                                                                                                                                                                                | 171     |
| — Further Notice of the Recent Eruption from the Volcano of Mauna Loa in Hawaii (Owhyhee). [Abstract.].....                                                                                                                                                                                               | 386     |
| MOGGRIDGE, M., Esq. On the Section exposed in the Excavation of the Swansea Docks .....                                                                                                                                                                                                                   | 169     |
| MOORE, J. C., Esq. On the Silurian Rocks of Wigtownshire.....                                                                                                                                                                                                                                             | 359     |
| MURCHISON, Sir RODERICK I. On the Discovery by Mr. Robert Slimon of Fossils in the Uppermost Silurian Rocks near Lesmahago in Scotland, with Observations on the Relations of the Palæozoic Strata in that part of Lanarkshire .....                                                                      | 15      |
| OWEN, Prof. R. Description of a Fossil Cranium of the Musk-Buffalo [ <i>Bubalus moschatus</i> , Owen; <i>Bos moschatus</i> (Zimm. and Gmel.), Pallas; <i>Bos Pallasii</i> , De Kay; <i>Ovibos Pallasii</i> , H. Smith and Bl.] from the Lower-Level Drift at Maidenhead, Berkshire. (With Figures.) ..... | 124     |
| — On the Affinities of the large Extinct Bird ( <i>Gastornis Parisiensis</i> , Hébert), indicated by a Fossil Femur and Tibia discovered in the Lowest Eocene Formation near Paris. (With a Plate.)..                                                                                                     | 204     |
| — Description of some Mammalian Fossils from the Red Crag of Suffolk. (With Figures.).....                                                                                                                                                                                                                | 217     |
| PLANT, JAMES, Esq. On the Upper Keuper Sandstone (included in the New Red Marls) and its Fossils at Leicester.....                                                                                                                                                                                        | 369     |
| POOLE, H., Esq. Notice of a Visit to the Dead Sea. [Abstract.]..                                                                                                                                                                                                                                          | 203     |
| — On the Coal of the North-Western Districts of Asia Minor ..                                                                                                                                                                                                                                             | 1       |
| PRESTWICH, J., Esq. On the Boring through the Chalk at Kentish Town, London.....                                                                                                                                                                                                                          | 6       |
| — Note on the Gravel near Maidenhead, in which the Skull of the Musk-Buffalo was found.....                                                                                                                                                                                                               | 131     |
| — On the Correlation of the Middle Eocene Tertiaries of England, France, and Belgium. [Abstract.] .....                                                                                                                                                                                                   | 390     |

#### ERRATA.

- Part I. p. vi, line 6 from bottom, *for* L. L. Dillwyn *read* L. W. Dillwyn.  
lxx., line 9 from top, *for* o Alet *read* d'Alet.  
239, in description of woodcut, *read* *b.* Anthracite-schist (\*), and grey and purple, &c.  
243, line 10 from bottom, *for* *c* *read* *b.*  
244, line 7 from top and the following lines, *read* In the lower or first group there are six pairs of large imprints, gradually coming nearer to the central line, and somewhat closer also to each other, as far as *c*, which may have been a point of rest, and is nearer to the groove than any of the others.  
244, add to the note *after* central line; the wider track would then indicate a relaxation, and not an increase, of effort.  
247, line 8 from bottom, *read* Church Stretton; and W. of.  
254, line 16 from top, *for* Marguise *read* Marquise.
- Part II. p. 14, lines 5, 16, and 20 from bottom, *for* pianzite *read* piauzite.  
15, line 22 from top, *for* *phodadiformis* *read* *pholadiformis*.  
20, line 13 from bottom, *for* Sau-alps *read* Sau-alp.
- 

#### *Directions to the Binder.*

The Binder is directed to place opposite page 46 the page numbered 46\*; and at page 350 the loose slip relating to Prof. Naumann's paper on gneiss, &c.

**LIST OF THE FOSSILS FIGURED AND DESCRIBED  
IN THIS VOLUME.**

[In this list, those fossils the names of which are printed in Roman type have been previously described.]

| Name of Species.                                        | Formation.                  | Locality.                         | Page. |
|---------------------------------------------------------|-----------------------------|-----------------------------------|-------|
| <b>RIPPLE-MARKS.</b>                                    |                             |                                   |       |
| Ripple-Marks. Pl. iv. f. 5 & 6, and<br>Woodcut, p. 251. | Cambrian .....              | Longmynd .....                    | 250   |
| Marks of —? Pl. iv. f. 4.....                           | Cambrian .....              | Longmynd .....                    | 250   |
| <b>PLANTA.</b>                                          |                             |                                   |       |
