

ALPHABETICAL INDEX

TO THE

PROCEEDINGS OF THE GEOLOGICAL SOCIETY.

The fossils referred to are described, and those of which the names are printed in italics are also figured.

- ABERYSTWYTH** group of rocks, described, 152.
- Abich, M.**, on Rocca Monfina, lxxxii.
- Anglesea**, direction of cleavage planes in, 93.
- Anniversary Address of the President, Leonard Horner, Esq.**, xix-xc. See also Horner, Mr.
- Annual General Meeting of the Society**, proceedings at, i.
- Anthony, Mr.**, on an impression of the soft parts of an Orthoceras, 255.
- Arca subrostrata*, n. sp., 418.
- Artemis elliptica*, n. sp., 417.
- Astræa**, geographical limits of, 63.
- Atherfield, Isle of Wight, Dr. Fitton** on a section at, 289.
- Australia, Mr. Jukes** on its geology, 241.
- Avranches**, depression of the land near, 237.
- Babbage, Mr.**, observations on the Temple of Serapis, and the causes of geological cycles of great extent, 186.
- Bagshot sands, Mr. Prestwich** on, 378.
- Bala**, lines of cleavage at, 91.
- Barrande, M.**, on Silurian system of Bohemia, xc, 177.
- Batracholites*, indicative of a small species of frog, Prof. Owen on, 224.
- Beaumont, M. E. de**, notice of his Leçons de Géologie Pratique, xxxii.
- Bisberg iron mines**, 16.
- Bischof's, Prof.**, Geology noticed, xxxii.
- Bœotia, Lieut. Spratt** on the geology of a part of Eubœa and, 67.
- Bognor beds**, fossils of, 366.
- Bombay, Mr. G. Clark** on the neighbourhood of, and on beds containing fossil frogs, 221.
- Boué, Dr. Ami**, award of Wollaston medal to, xix.
- Bracklesham beds**, 386; fossils of, 391. See London clay.
- Breton, Cape, Mr. Brown** on the gypsiferous strata of, 257.
- , Mr. Bunbury on fossil plants from the coal-field of, 423.
- Brittany**, proofs of the depression of its coasts, 237.
- Brodie, Rev. P.**, notice on the existence of Purbeck strata with remains of insects and other fossils at Swindon, Wilts, 33.
- Brora, Sutherlandshire, Mr. Robertson** on the Wealden beds of, 113.
- Brown, Mr.**, on the gypsiferous strata at Cape Dauphin, in the island of Cape Breton, 257.
- Bunbury, Mr.**, description of fossil plants from Richmond, Virginia, 281.
- , on fossil plants from the coal formation of Cape Breton, 423.
- Cader Idris**, section through the chain of, 146.
- Calamites**, vertical, in Virginia coal-field, 262.
- Calcaire grossier**, compared with London clay, 355.
- Calf of Man, Rev. J. Cumming** on the geology of the, 179.
- Cambrian system, Prof. Sedgwick** on the meaning of the term, 159; Sir R. Murchison on its original meaning, 165.
- Cambrian series**, comparison of, in Wales and Westmoreland, 156.
- Cancellaria decussata*, n. sp., 421.
- Cardiganshire**, direction of cleavage planes in, 94.
- Cardium pholadiforme*, n. sp., 417.
- *latisulcatum*, n. sp., 417.
- Carnarvonshire**, area of elevation in, 90.
- , sections in, 136, 148.
- Caspian Sea**, remarks on the geology of its vicinity, 123.
- Catopterus macrurus**, characters of, 276.
- Cephalonia, Mr. Hamilton and Mr. Strickland** on the geology of part of, 106.
- , Mr. Strickland's description of fossils from, 112.
- Charcoal, structure of mineral*, 268, 269.
- Chimæroid fishes, Sir P. G. Egerton** on

INDEX TO THE PROCEEDINGS.

- the nomenclature of fossil, 350 ; table of genera and species of, 352.
- Chines in Isle of Wight, mode of their formation, 290.
- Chiton amiculatus*, 49.
- *Cumingii*, 49.
- Chitonellus*, 49.
- Cincinnati, Mr. Anthony on the blue limestone at, 255.
- Clark, Mr. G., on the neighbourhood of Bombay, and certain beds containing fossil frogs, 221.
- Clarke, Rev. W. B., on the geology of Lafu, 61.
- Cleavage, Mr. Sharpe on slaty, 74.
- Clinometer, Mr. Grantham on a new, 232.
- Coal-field of E. Virginia, Mr. Lyell on the, 261 ; shells from, figured, 274 ; fossil fish, 275 ; plants, 278 ; probable age of, 280 ; Mr. Bunbury on plants from, 281.
- Coals and coke, analysis of American, 270.
- Compton Bay, section at, 315.
- Conybeare, Mr., report on the country between the summit of the Malsej Ghaut and the Gungathuree, 225.
- Coral reefs at Lafu, 61.
- growing at Port Jackson, 63.
- Cornwall, area of elevation of, 94.
- Crackers group in Isle of Wight, 297 ; list of its fossils, 299.
- Criocerases and Scaphites, Mr. Sowerby on the characters of, 303.
- Crioceratites Bowerbankii*, 303.
- Cumberland, Prof. Sedgwick on the classification of the rocks in, 133.
- Cumming, Rev. J., geology of the Calf of Man, 179.
- Cystidea, occurrence of, in Lower Silurian strata, 37.
- Dalecarlia, Sir R. I. Murchison on the geology of, 3 ; notice of the mines in, 15.
- Danemora iron mines, described, 15.
- Darwin, Mr., notice of his work on South America, xxxi, lxviii.
- Daubeny, Dr., on Rocca Monfina, lxxxi.
- Dauphin, Cape, Mr. Brown on gypiferous strata at, 257.
- De la Beche, Sir H. T., notice of his memoir on the formation of the rocks in South Wales and South-western England, xxxiv, lxxxv.
- Depressions in the land, Mr. Smith on recent, 234.
- Devonshire, area of elevation in, 94.
- Dictyopteris obliqua*, n. sp., 427.
- Dictyopyge macrura*, n. sp., 275.
- Donations to the Library of the Geological Society in the year 1846, 129 ; in 1847, 218, 329, 432.
- D'Orbigny, M., award of Wollaston Donation fund to, xxi.
- Drift, Prof. Whewell on the wave of translation in connexion with the northern, 227.
- Edaphodon*, characters of genus, 351.
- Egerton, Sir P. Grey, on the nomenclature of fossil chimæroid fishes, 350.
- Ehrenberg, Prof., on volcanic dust, lii.
- Elasmodus, genus of chimæroid fishes, characterized, 351.
- Elephas primigenius, found at Gozo, 52.
- Elevation of land, recent, 186.
- , Mr. Babbage on causes of, 206.
- Elf Dal, porphyry and old red sandstone in, 11.
- Eubœa and Bœotia, Lieut. Spratt on the geology of a part of, 67 ; description of fossils from, by Prof. E. Forbes, 73.
- Expansion of stones from heat, 204.
- Fablon, notice of its mines, 15.
- Ferns, Mr. Bunbury on the geographical distribution of recent, 436.
- Filicites fimbriatus*, 283.
- Fish, fossil, from Eastern Virginia, 275.
- Fishes, Sir P. Egerton on the classification of fossil chimæroid, 350.
- Fitton, Dr., on a section at Atherfield in the Isle of Wight, 289.
- Forbes, Prof. E., on fossils from Samos and Eubœa, 73.
- , notice of his memoir on the Fauna and Flora of the British Isles, lv.
- Fox, fossil, of Eningen, description of, by Prof. Owen, 55.
- France, recent sinking of the coast of, 237.
- Frogs, Mr. G. Clark on beds at Bombay containing, 221.
- , Prof. Owen on remains of, 224.
- Fusus filamentosus*, n. sp., 112.
- Galecynus œningensis* (fossil viverrine fox of Eningen), 55, 57, 58.
- Geological Survey, Memoirs of, notice of, xxxi, lv, lxxxv.
- Geysers, temperature of the, liii.
- Ghaut, Mr. Conybeare on the Malsej, 225.
- Goldsworthy, section at, 382.
- Gothland, Sir R. Murchison's description of the Silurian rocks of, 18 ; list of fossils contained in, 28.
- Gozo, elephant's tooth found at island of, 52 ; proofs of its recent depression, 240.
- Grantham, Mr., on a new Clinometer, 232.
- Greensand in Isle of Wight, Dr. Fitton on a section in the, 285 ; comparison of the greensand in England with that of France, 324 ; table of the distribution of its fossils, 328.

INDEX TO THE PROCEEDINGS.

- Gypsiferous strata of Nova Scotia, Mr. Brown on, 257.
- Hala mountains, S. de, structure of, 335.
- Hamilton, Mr., and Mr. Strickland on part of Cephalonia, 106.
- Heat, Mr. Nasmyth on slow transmission of, 232.
- , table of expansion of rocks from, 204.
- Hecla, eruption of, in 1845, 1.
- Helminthochiton, genus described, 51.
- *eburonicus*, 49.
- *Griffithii*, 49.
- *priscus*, 49.
- Hoburg (Gothland), limestone beds at, 25.
- Hög Klint (Gothland), its geology, 19.
- Hör, fossil plants in sandstone of, 35.
- Horner, Mr. (President), Address on awarding the Wollaston medal to Dr. Boué, xix; Donation fund to M. D'Orbigny, xxi. Anniversary address, February 1847, xxii. *Notices of deceased Fellows*: Dr. Bostock, xxiii; Rev. R. Hennah, xxiii; Mr. Kaye, xxvi; M. Pusch, xxvi. *Progress of Geology*: Notice of Memoirs of the Geological Survey of Great Britain, xxxi; Mr. Darwin on South America, xxxi; M. E. de Beaumont's *Leçons de Géologie Pratique*, xxxii; Prof. Bischof's *Geology*, xxxii; Sir H. T. De la Beche's Memoir on the Formation of the Rocks of South Wales and South-western England, xxxiv; *The recent period*, xxxvi.; Mr. Lyell's classification of tertiary deposits, xxxvii; his views of geological changes now in progress, xli; his observations on the formation of the delta of the Mississippi, xli; Prof. Forbes on recent changes in Lycia, xlv; Mr. Lyell's account of impressions of rain-drops and foot-prints on sandstone, xlvii; Mr. Darwin on recent elevations in South America, xlviii; Sir R. Murchison on changes produced by the Russian rivers, xlix; recent eruption of Mount Hecla, 1; Ehrenberg on volcanic dust, lii; temperature of the Geysers, liii. *Pleistocene period*, lv; Prof. Forbes on the Fauna and Flora of the British Isles, lv; former connexion of Britain with the continent, lxiii; Mr. Darwin on the Pampean formation, lxviii; on the elevation of Patagonia, lxxii; on the mode of formation of the Cordillera, lxxiv; Sir R. Murchison on the elevation of the Ural, lxxix; on the fossil mammalia of Russia, lxxix; Mr. Lyell on American Mastodon, lxxxi; Dr. Daubeny, M. Abich and M. Pilla on the volcano of Rocca Monfina, lxxxi; Sir H. T. de la Beche on the formation of the rocks of S.W. England, lxxxv; his account of palæozoic volcanos, lxxxvi; his views of the nature of metamorphic action, lxxxvii; on the causes of the different colours of rocks, lxxxviii. *Palaontology*, lxxxix; Mr. Griffith's Silurian fossils of Ireland, lxxxix; London Geological Journal, lxxxix; M. von Meyer's *Palæontographica*, xc; Prof. Quenstedt's *Petrofactenkunde Deutschlands*, xc; Count von Keyserling's *Petschora fossils*, xc. *Conclusion*, xc.
- Hot springs of Luckee, 341.
- Ischyodus*, characters of genus, 351.
- James, Capt., on a section at Portsmouth harbour, 249.
- James river, Virginia, Mr. Lyell on the structure and probable age of coal-field of the, 261.
- Jukes, Mr., on the palæozoic formations of New South Wales and Van Diemen's Land, 241.
- Jurassic formations, Mr. Robertson on the classification of, 113.
- Kembridge, section in Loudon clay at, 360.
- Kent's Cavern, Torquay, Mr. Vivian on, 353.
- Keyserling, Count, on the Petschora, xc. Kurrachee, geology of its vicinity, 334.
- Lafû, Rev. W. B. Clarke on the geology of the island of, 61.
- Lancashire, classification of the fossiliferous slates in, 133.
- Lepidodendron? binerve*, n. sp., 431.
- ? *tumidum*, n. sp., 432.
- Lignite bed in Eubœa, 69.
- Lixouri, Mr. Hamilton and Mr. Strickland on a tertiary deposit at, 106.
- Llanberis slate quarries, section of, 138.
- London clay, Mr. Prestwich on the probable age of the, 234, 354; organic remains of, 364; comparison with French tertiaries, 375; table of its fossils, 401.
- Loyalty islands, noticed, 61.
- Lucina? Hisingeri*, n. sp., 24.
- Luckee hot springs, 341.
- Lyell, Mr., notice of his classification of tertiary rocks, xxxvii; on recent changes in America, xli; on impressions of rain-drops on sandstone, xlvii.
- , on the structure and probable age of the coal-field of the James river near Richmond in Eastern Virginia, 261.

INDEX TO THE PROCEEDINGS.

- Malsej Ghaut, Mr. Conybeare on, 225.
 Malta, recent depression of, 240.
 Mammalia, fossil, in Russia, lxxix.
 Man, Rev. J. Cumming on geology of the
 Calf of, 179.
 Mastodon, Mr. Lyell on remains of, in
 North America, lxxxix.
 Merionethshire, area of elevation in, 90.
 —, sections in, 143.
 Mines, in Sweden, 15.
Mitra juniperus, n. sp., 113.
 Murchison, Sir R. I., on the Silurian and
 associated rocks in Dalecarlia, and on
 the succession from Lower to Upper
 Silurian in Smoland, Oland and Goth-
 land, and in Scania, 1.
 —, on the tertiary deposit at Eningen
 containing the bones of the fossil
 fox, 54.
 —, notice of his views on recent
 changes in Russia, xlix; on the ele-
 vation of the Ural, lxxix.
 —, on Silurian rocks of N. Wales and
 the meaning of the term 'Cambrian
 system,' 165.
 —, introduction to Capt. Vicary's se-
 cond memoir on the geology of parts
 of Sinde, 331.
 Naples, tides in the Bay of, 235, note.
 Nasmyth, Mr., on slow transmission of
 heat, 232.
Nassa Pusio, n. sp., 421.
 — *proxima*, n. sp., 422.
 — *parvula*, n. sp., 422.
 — *inconspicua*, n. sp., 422.
Natica perpusilla, n. sp., 420.
Neuropteris linnaefolia, n. sp., 281.
 — *cordata*, 423.
 — (*var. angustifolia*), 424.
 — *varinervis*, n. sp., 425.
 New South Wales, Mr. Jukes's notes on
 the palaeozoic formations of, 241.
 Norfolk Bay, New South Wales, geology
 of, 247.
 Northern Drift, Prof. Whewell on,
 227.
Odontopteris subcuneata, n. sp., 427.
 Eningen, Sir R. I. Murchison on the
 tertiary deposit at, 54.
 —, Prof. Owen on fossil fox of, 55.
 Oland, Sir R. I. Murchison on the geo-
 logy of, 16.
 Oolite coal of Eastern Virginia, Mr.
 Lyell on the, 261.
Orthoceras, Mr. Anthony on an impres-
 sion of the soft parts of, 255.
Ostrea crassicaolata, n. sp., 420.
 Owen, Prof., on the fossil viverrine fox
 of Eningen, 55.
 —, on the Batracholites, indicative
 of a small species of frog, 224.
 Palaeontology, progress of, in 1846,
 lxxxix.
 Palaeozoic rocks of New South Wales,
 Mr. Jukes on, 241.
Passalodon, shown to be a portion of
Edaphodon, 353.
Pecopteris (Aspidites) bullata, n. sp.,
 283.
 — *taniopteroides*, n. sp., 428.
Pecten Pandorae, 418.
 — *tenuisulcatus*, n. sp., 418.
 — *conjux*, n. sp., 418.
 — *Josslingii*, n. sp., 419.
 — *fraterculus*, n. sp., 419.
 — *expansus*, n. sp., 419.
 — *acuticostatus*, n. sp., 419.
 — *macrois*, n. sp., 420.
 — *giganteus*, n. sp., 420.
 Pembrokehire, cleavage planes in, 94.
 Petherwin, limestone quarries at South,
 77.
Pholas altior, n. sp., 417.
 Pilla, M., on Rocca Monfina, lxxxii.
 Plants, fossil, from Virginia, described,
 281; from coal formation of Cape
 Breton, 423.
Pleurotoma levigata, n. sp., 421.
 — *denudata*, n. sp., 421.
 Plylimmon group, described, 152.
 Porphyry, varieties of, in Sweden, 8; of
 Elf Dal, 11.
 Portsmouth Harbour, Capt. James on a
 section at, 240.
 Pozzuoli, changes of level in the land
 near, 186, 234.
 Prestwich, Mr., on the probable age of
 the London clay, and its relations to
 the Hampshire and Paris tertiary sys-
 tems, 234, 354.
 —, on the main points of structure
 and the probable age of the Bagshot
 sands, 378.
 —, table of English and French ter-
 tiary systems, 400.
 Purbeck strata with insects at Swindon,
 Wilts, 53.
 Radnorshire, cleavage planes in, 94.
Rana pusilla, n. sp., 224.
 Report, Annual, for 1847, i.
 Rhayader slates, described, 153.
 Richmond, Virginia, Mr. Lyell on coal-
 field of, 261.
 Robertson, Mr., on the Wealden of
 Brora, Sutherlandshire, with remarks
 on the relations of the Wealden strata
 and Stonesfield slate to the rest of the
 Jurassic system, 113.
 Rocca Monfina, geology of, lxxxii.
 Salter, Mr., description of a fossil Chiton,
 48.
 —, on structure of Trinucleus, 251.

INDEX TO THE PROCEEDINGS.

- Samos, Lieut. Spratt on the geology of, 65.
- Sandown Bay, section at, 316.
- Scalaria tenera*, n. sp., 420.
- Scania, Sir R. I. Murchison on the geology of, 32.
- Scaphites and Crioceras, Mr. Sowerby on, 303.
- Scaphites Hillsii*, 303.
- *gigas*, 303.
- Scaphodus, shown to be a portion of *Elasmodus*, 353.
- Silly islands, proofs of their recent depression, 238.
- Sedgwick, Prof., on the classification of the fossiliferous slates of N. Wales, Cumberland, Westmoreland and Lancashire, 133.
- Serapis, Mr. Babbage on temple of, 186.
- , Mr. Smith on temple of, 234.
- Shanklin, section at, 316.
- Sharpe, Mr., on slaty cleavage, 74.
- , letter to Mr. Smith on the tertiary beds of the Tagus, 423.
- Sidney, New South Wales, geology of its vicinity, 241.
- Silurian rocks of Sweden, Sir R. I. Murchison on, 1; comparison of, with those of Russia and Britain, 36.
- fossils in Gothland, list of, 28–30.
- rocks of North Wales, Prof. Sedgwick on, 133; Sir R. I. Murchison on, 165.
- rocks of South Wales, Prof. Sedgwick on, 150, 154.
- 'Silurian system,' Sir R. I. Murchison on use of the term, 36, 165.
- , Prof. Sedgwick on its limits, &c., 159.
- Sinde, Capt. Vicary on the geology of parts of, 334.
- Slaty cleavage, Mr. Sharpe on, 74.
- Smith, Mr. J., of Jordan-hill, on the occurrence of *Elephas primigenius* at Gozo, 52.
- , on recent depressions in the land, 234.
- , on the tertiary beds of the Tagus, 410.
- Smoland, Sir R. I. Murchison on the geology of, 16.
- Snowdon, lines of cleavage near, 91.
- Soller island, Dalecarlia, geology of, 5.
- Southampton, fossils from the Bognor beds at, 367.
- Sowerby, Mr. G. B., descriptions of fossils from the Tagus, 417.
- Sowerby, Mr. J. D. C., on Scaphites and Crioceras, 303.
- Sphenophyllum erosum*, 430.
- Spirifer*, Mr. Sharpe on distortions in, 78.
- Spratt, Lieut., remarks on the geology of the island of Samos, 65.
- , on the geology of a part of Eubœa and Bœotia, 67.
- Stonesfield slate, Mr. Robertson on its position, 116.
- Strickland, Mr., and Mr. Hamilton on part of Cephalonia, 106.
- , on fossils from Cephalonia, 112.
- Sweden, Sir R. I. Murchison on the Silurian rocks of, 1, 36.
- Swindon, Rev. P. Brodie on the existence of Purbeck strata with remains of insects at, 53.
- Tagus, Mr. Smith on the age of the tertiary beds of the, 410; catalogue of fossils from, 411; description of new species found in them, by Mr. G. B. Sowerby, 417.
- Tasmania, Mr. Jukes on the geology of portions of, 245.
- Tertiary formations of England and France, comparison of, 359, 400.
- of the Tagus, Mr. Smith on the age of, 410.
- Tetragonolepis*, from Eastern Virginia, 277.
- Tintagel, notice of its fossils, 76.
- Translation, Dr. Whewell on wave of, 227.
- Tremadoc, section near, 139.
- Trinucleus, Mr. Salter on structure of, 251.
- Trinucleus ornatus*, 252.
- *fimbriatus*, 252.
- Tufa, calcareous, deposits of, on Hala mountains, 345.
- Turritella bicarinata*, n. sp., 421.
- (*Proto*, Def.) *mutabilis*, n. sp., 221.
- Van Diemen's Land, Mr. Jukes on its geology, 241, 245.
- Vegetation, Mr. Walton on the laws of the development of existing, 64.
- Vicary, Capt., on the geology of parts of Sinde, 334.
- Virginia, Mr. Lyell on coal-field of the James river near Richmond in Eastern, 261; Mr. Bunbury on plants from coal-field of, 281.
- Viverrine fox of Cœningen, Prof. Owen's description of the, 55.
- Vivian, Mr., on Kent's Cavern, Torquay, 353.
- Voluta spoliata*, n. sp., 422.
- Wales, Prof. Sedgwick on the fossil slates of North, 133.
- , system of South, 150.
- Walton, John, Esq., on development of existing vegetation, 64.

INDEX TO THE PROCEEDINGS.

- Wave of translation, Dr. Whewell on, in connexion with the northern drift, 227.
- Wealden beds of Brora, Mr. Robertson on the, 113.
- formations, Mr. Robertson on their classification, 116.
- Westmoreland, Prof. Sedgwick on the classification of the rocks in, 133.
- Whewell, Dr., on the wave of translation, 227.
- White-cliff Bay, section at, 362.
- Wight, Dr. Fitton on section at Atherfield in Isle of, 289.
- Wisby (Gothland) limestone, described, 18.
- Wollaston medal, award of, in 1847, xix.

THE END.
