### ERRATA.

- Page 52, line 4 from bottom, for *oxygonum* read *oxygonus*.  
 — 115, — 17 from top, for *Secretary* read *President*.  
 — 190, and Plate XXI. fig. 1, *Tellina Sobralensis* is erroneously stated to be from subcretaceous beds between Sobral and Torres Vedras; it belongs to the "Almada Beds" of the Tertiary Series, having been found at Portella, about four miles north of Lisbon on the road to Saccavem. The original specimen was received mixed with others from the former locality, and the error was only discovered after the publication of the paper. This species must therefore be struck out of the lists at pp. 154, 172, and 200.  
 — 331, line 7 from top, dele *Eschara*: PL. XVIII. f. 8.  
 — 370, — 10 from top, for *Cerbero* read *Cerboli*.  
 — 454, — 2 from top, after *Ammonites* read *biplex*, Sow.

#### *Directions to the Binder.*
