

PUBLICATIONS ON SALE FROM THE GEOLOGICAL SOCIETY

QUARTERLY JOURNAL, Vols. III to LXXXVI inclusive. Price £1 10s. per volume (unbound), to Fellows £1. Separate parts, price 7s. 6d. each, to Fellows 5s. Postage extra. Certain parts are out of print, and others, on account of their scarcity, available only at enhanced prices. The numbers and prices of these parts can be obtained at the Society's office.

GENERAL INDEX TO THE FIRST FIFTY VOLUMES OF THE QUARTERLY JOURNAL (1845-94). Part I (A-La), Part II (La-Z). Price 7s. 6d. each, to Fellows 5s. Postage extra.

GEOLOGICAL LITERATURE added to the Geological Society's Library during the years ended December 31st, 1894-1914, 1920-24. Price 5s. each, to Fellows 3s. 9d. Postage extra. Geological Literature for 1915-19 (in one volume), 1926-30. Price 10s. each, to Fellows 7s. 6d. Postage extra.

HISTORY OF THE GEOLOGICAL SOCIETY OF LONDON. By H. B. WOODWARD, F.R.S. 8vo, London, 1907. Price 3s. Postage extra.

FROM MURBY'S LIST

Professor Shand's New Book

THE STUDY OF ROCKS. By S. J. SHAND, D.Sc., Ph.D., F.G.S., Professor of Geology, University of Stellenbosch. 6s. net, postage 6d.

This is a book for students who have already made a beginning with elementary geology and who wish to make a closer study of the nature and composition of rocks. The vexed question of the classification of eruptive rocks is discussed in a chapter which may be read with profit by more advanced students, for it gives an outline of no less than ten systems which are in use at the present day.

INSTRUCTIONS FOR USING THE QUANTITATIVE MINERALOGICAL CLASSIFICATION OF ERUPTIVE ROCKS. By Prof. S. J. SHAND.

1s. 3d. net, postage 1d. Explains the application of the classification proposed in Professor Shand's larger work :—

ERUPTIVE ROCKS. Their Genesis, Composition, Classification and their Relation to Ore Deposits. By Prof. S. J. SHAND. 44 illustrations. 20s. net, postage 9d.

THE JAPANESE EARTHQUAKE OF 1923. By C. DAVISON, D.Sc., F.G.S., author of *A History of British Earthquakes, Founders of Seismology, Manual of Seismology*, etc. Describes the great Japanese disaster and deals with this earthquake as a geological event in the history of the earth. 40 diagrams. 7s. 6d. net, postage 6d.

The late Dr. Barker's Last Two Books

THE STUDY OF CRYSTALS : A general Introduction. By the late Dr. T. V. BARKER. 8s. 6d. net, postage 6d.

SYSTEMATIC CRYSTALLOGRAPHY. An Essay on Crystal Description, Classification and Identification. By the late Dr. T. V. BARKER. 7s. 6d. net, postage 6d.

"This highly important essay deserves close study by all workers in this field."—*Prof. A. Hutchinson in "The Times."*

ORDINARY MEETINGS OF THE GEOLOGICAL SOCIETY TO BE HELD AT BURLINGTON HOUSE

SESSION 1930–1931.

1931.

Wednesday, June 3* & 17*

[Asterisks denote the days on which the Council will meet.]

RECENT AND FORTHCOMING BOOKS

GERMAN-ENGLISH GEOLOGICAL TERMINOLOGY. By Dr. W. R. JONES and Dr. A. CISSARZ. *Probably ready November.*

The terms commonly used in general geology, palæontology, crystallography, mineralogy, petrology, the study of mineral deposits, etc., in English and in German are defined and exemplified in parallel texts. Appendices give, in the two languages, abbreviations frequently used, names of elements and minerals, and conversion tables. The book is fully indexed.

A PRACTICAL HANDBOOK OF WATER SUPPLY. By Dr. F. DIXEY, Director of the Geological Survey, Nyasaland. **21s. net.**

Although this book has been written for those who are faced with the practical problems of finding water in undeveloped areas, the geological aspect is so thoroughly and competently treated that the work deserves to be included in every geological library.

THE STUDY OF ROCKS. By Professor S. J. SHAND. **6s. net.**

"Eruptive, sedimentary and metamorphic rocks are discussed in turn and as much attention is given to their appearance in the field as to their mineralogical and chemical characters. The vexed question of the classification of eruptive rocks is discussed in a chapter which may be read with profit by more advanced students, for it gives an outline of no less than ten systems which are in use at the present day."—*Extract from prospectus.*

THE JAPANESE EARTHQUAKE OF 1923. By Dr. C. DAVISON. **7s. 6d. net.**

"... a most comprehensive account of the disaster, and so well illustrated with photos, maps and diagrams and supplied with statistics that it can well be regarded as a very useful earthquake text-book."—*Bulletin of the Imperial Institute.*

German-English Geological Terminology

By W. R. JONES, D.Sc., F.G.S., M.I.M.M. and DR. A. CISSARZ

The English and German terms are defined and exemplified in parallel texts

CONTENTS

- I. Introduction
- II. Denudation of rocks
- III. Earth movements
- IV. Vulcanism
- V. Principles of Stratigraphy
- VI. Palaeontology
- VII. Crystallography
- VIII. Physical Mineralogy
- IX. Chemical Mineralogy
- X. External forms of minerals
- XI. Petrology
- XII. Sedimentary rocks
- XIII. Metamorphic rocks
- XIV. Ore deposits

APPENDICES:

Abbreviations, Conversion tables (measures, weights, etc.), The chemical elements, Mineral Names.

INDEXES

INHALTSVERZEICHNIS

- I. Einleitung
- II. Abtragung der Gesteine
- III. Erdbewegungen
- IV. Vulkanismus
- V. Grundlagen der Stratigraphie
- VI. Paläontologie
- VII. Kristallographie
- VIII. Kristallphysik
- IX. Mineralchemie
- X. Ausbildungsformen der Mineralien
- XI. Petrologie
- XII. Sedimentgesteine
- XIII. Metamorphe Gesteine
- XIV. Erzlagerstätten

ANHÄNGE:

Abkürzungen, Vergleichstabelle (Maasse, Gewichte, u.s.w.), Die chemischen Elemente, Mineralnamen.
