INSTRUCTIONS TO AUTHORS

Authors proposing to submit papers for publication in the Journal should consult the Society’s ‘Notes for authors’ (Proceedings of the Geological Society no. 1627), which sets out the Society’s requirements for the typescript and illustrations. The following notes are for the guidance of intending authors:

1. The Journal of the Geological Society—contents: Short papers, 3,000 words or less, are welcome but the average length is 8,000 words (maximum 12,000 words).

2. Manuscripts should be sent to the Scientific Editor, Department of Geology, Bedford College, Regent’s Park, LONDON N.W.1. Papers should be written concisely and illustrations and tables kept to a minimum. The paper should be organised as shown below (see Journal for examples):
   a) Title—concise and specific. The title page should also list: Author(s) full name(s); Laboratory or Institution of origin; Address for mailing proofs; Suggested title for running heads.
   b) List of Contents—Headings of individual sections and sub-sections.
   c) Summary—should not normally exceed 200 words.
   d) Introduction and main body of paper—followed by any Appendices.
   e) References (see below) followed by author(s) name(s) and address(es).
   f) Explanations and captions of Plates and text figures—Tables.

3. References—Authors are responsible for seeing that references are given correctly in Journal style, as in the World List, and for checking them against citations in the text. Only papers cited in the text should be included in the list of references—arranged under the Harvard system (consult notes for authors (Proceedings, 1627, 1965) or a recent Journal for examples).

4. Illustrations—Maximum page area 20 cms × 14 cms (8 inches × 5½ inches). Drawings should be in black Indian ink on white paper or a tracing medium. A metric scale should be included on each diagram and co-ordinates of latitude and longitude, or a national grid reference, on all maps. Figures should be drawn with a view to a reduction of about × ½. After reduction no lettering should be less than 2 mm high. Copies of figures should have the ‘Top’ clearly marked and also the authors name and the figure number. Only photocopies reduced to the suggested size of reproduction in the Journal should be submitted with the manuscript. Originals of all figures, maps and plates should be retained until they are required by the Editor.

5. Units of Measurement—metrication—S.I. units of measurement should be used where possible. During the period of change over to S.I. units, papers will be accepted with imperial units of measurement. Where practicable these should have the S.I. equivalents in parentheses after the Imperial Units.

6. Submission—Two copies of the typescript should be submitted to the Scientific Editor; (Recorded Delivery). Typing should be double-spaced (including Tables) on one side of the paper—with a 2.5 cm margin on each side. Suggested positions of tables and figures should be indicated in the text. Tables and captions for figures and plates should be typed on separate sheets at end of paper. All pages should bear the author(s) name(s) and should be numbered serially.

7. Proofs—Two sets of tagged page proofs and the original manuscript will be sent to the author. The corrected marked proof should be returned with the original manuscript to the Scientific Editor within seven days.

8. Reprints—Twenty-five reprints of each paper will be supplied free—additional copies may be purchased.

THE PROCEEDINGS—SHORT CONTRIBUTIONS

The pages of the Proceedings which occur at the end of the Journal are open for the discussion of papers that have already appeared in the Journal. Any Fellow may contribute to these discussions but they are intended primarily for the benefit of Fellows (and particularly those resident overseas) who are unable to attend the meetings of the Society.

Contributions should not as a rule exceed 250 words (half a page of the Journal), and they will be subject to editing. They should be typewritten, and the title of the paper discussed and the name of its author should appear plainly at the top of the typescript.

Authors are responsible for the accuracy of the facts and for the opinions contained in their contributions, and for the correctness of references. It will not be possible for Editors to enter into correspondence about contributions nor to submit proofs to the contributors. Contributions should be addressed to:

The Editor,
Journal of the Geological Society,
Burlington House,
Piccadilly,
LONDON W1V OJU.
