Subscriptions

All correspondence relating to trade subscriptions should be addressed to the Journal Subscriptions Department, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath, UK, BA1 3JN (tel 01225 440546; fax 01225 44236). The subscription price for 2003 to institutions and non-Fellows is £495 (UK), £565/$985 (overseas) post free.

The Society confers Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title CGeol. Chartered Geologists may also obtain the equivalent European title, European Geologist (EURGeo). One fifth of the Society's fellowship lives outside the UK.

To find out about the Society and how you can join, contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BN Tel +44 (0) 20 74398974; Fax +44 (0) 20 74398975; email: enquiries@geolsoc.org.uk. For information about the Society's meetings, consult Events on www.geolsoc.org.uk. To find out more about the Society’s Corporate Scheme, write to: enquiries@geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK), produces the Society’s international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the Canadian Association of Petroleum Geoscientists (CSEG), the Geological Society of America (GSA) and the Society of Sedimentary Geology (SPS) and the Geologists’ Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies’ publications at a discount. The Society’s online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit card.

NOTES FOR THE GUIDANCE OF AUTHORS

Submission: Four complete copies of all scripts (two for Discussions) should be submitted by recorded delivery or registered post. You should also e-mail the abstract, which will be used by the editor for finding referees. Please send all scripts to: Ms. Ma. Hills, Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK (e-mail: angharad.hills@geolsoc.org.uk).

Authors should also submit titles and abstracts of any related papers that they have in press or in the review process with other publications. These may be used during refereing. Authors are invited to suggest three suitable referees (with appropriate addresses), but normally the editor uses a review by at least one referee not nominated by the author.

Papers on major topics of international interest in any of the Earth sciences are welcomed. Papers longer than 12 pages require special editorial approval. There are c. 1000 words on a printed page.

Specials of up to 4 printed pages on topical issues will be given priority for publication and be speeded through the reviewing and editing stages (see editorial, vol. 144, p. 367). The envelope should be clearly marked 'Special'. Papers are accepted on the understanding that they have not been submitted or published elsewhere and become copyright of the Geological Society. Papers are also accepted on the understanding that all authors consent to the submission.

Format: Papers will be typeset from the author’s disc. When your paper is accepted you will need to provide a Word or rich text format (RTF) file.

Typocharts should be double-spaced, including references, on one side of the paper only with a 25 mm margin on each side. All pages should bear the author’s name and be numbered serially. Test, figures and tables should be succinct, and photographs kept to a minimum. A Paper should be arranged as follows:

Title: brief and specific; followed by name(s) and address(es) of authors (including e-mail address of corresponding author).

Abstract: this must be intelligible without reference to the paper, and should not exceed 200 words (for ‘Specials’).

Four or five keywords (to be chosen from the GeoRef Thesaurus) should accompany each paper.

Main body of paper: subdivided into 1st, 2nd and 3rd order headings; omit heading ‘Introduction’.

Acknowledgements (if any).

Captions for text-figures.

References: list all references cited. The author is responsible for ensuring that the references are correct. Reference in the text to papers with more than two authors should be made thus: (Smith et al. 1978), but cited in full in the References. Do not abbreviate journal titles. Please key the authors’ names as Caps and lower case. Use italics between page numbers and do not use commas in page numbers over 9999.

Line drawings: The top should be indicated. Drawings should have a line width and lettering suitable for reduction to the type area of 236 x 176 mm or less. After reduction, the smallest capital letter should not be less than 2 mm high. A metric scale should be included, and north point (and where relevant, coordinates of latitude and longitude, or National Grid) put on all maps.

Use a recognized software package that allows you to save as EPS files with all fonts embedded and a tiff preview. Do not use default settings (e.g. minimum line or hairline) for line widths. These will not reproduce. If you produced the figures using CorelDraw, Illustrator or Freehand it would be helpful also to supply the native files.

Handrawn diagrams should be black on white card or opaque paper. Avoid line stippling and tints. Do not scan these yourself.

Photographs: Ensure that the quality of the copies with the submitted manuscript is adequate for the referees to make their assessment. Do not mount photographs on a black background. If you wish to scan slides or photographs in order to annotate them, the resolution should be 390 dpi at the intended final size, TIF, GRF and PCX files are acceptable for half-tone illustrations (but rarely adequate for line drawings).

Table: Table should be typed and be designed to go across page margin. Tables may be divided into double columns. Note that every table should follow the style used in the Journal. Tables must be provided as Word, rich text format, Excel or comma delimited files.

Offprints may be ordered on the form provided at proof stage. Fifty free copies are supplied. You will also be sent instructions on how to obtain a PDF file.

Discussion of papers: 1000-word discussions on papers that have already appeared in the Journal or appropriate Society books are acceptable. Two copies should be submitted with the title and author(s) of the paper discussed.

Supplementary Publications: Limited space in the Journal means that detailed material, such as locality lists and analytical data, will be made available as Supplementary Publications. These files are stored in hard copy at the British Library and the Society Library and can now be hosted on the Society’s website. Acceptable formats for the online repository are zip and pdf. Maximum size in 5 MB per paper (can be ziped if necessary).

Enquiries: More information can be found at www.geolsoc.org.uk or contact Ms A. Hills at the above address.
