

NOTES FOR THE GUIDANCE OF AUTHORS

Papers on major topics of international interest in any of the Earth sciences are welcomed. Papers longer than 12 pages require special editorial approval. There are *c.* 1000 words on a printed page.

Specials of up to 4 printed pages on topical issues will be given priority for publication and be speeded through the reviewing and editing stages (see editorial, vol. 144, p. 367).

Review papers. The Journal is also interested in publishing occasional review style papers, presenting a summary of the state-of-play in topical aspects of the Earth sciences. These may be longer than standard papers, subject to the agreement of the Chief Editor, but otherwise follow the same format. Authors considering submitting reviews should discuss the subject matter and proposed content of the paper with the Chief Editor prior to submission.

All papers are accepted on the understanding that they have not been submitted or published elsewhere and become copyright of the Geological Society. Papers are also accepted on the understanding that all authors consent to the submission. Please ensure that all authors have seen and approved the submitted version.

Instructions for authors: full instructions on preparing your paper can be found at www.geolsoc.org.uk/jgs.

Submissions: all submissions to the Journal should be made online via: <http://jgs.allentrack.net>. Full instructions can be found within the site. There are additional help buttons throughout. You will need to register before you can submit. This is very easy. If you have previously submitted or reviewed a paper, you should already be in the system.

Before submitting a manuscript, it is recommended that you have the following to hand:

- all authors' first, middle names/initials and last names
- all authors' full postal and e-mail addresses.
- title and running title (you may copy and paste these from your manuscript)
- abstract (you may copy and paste this from your manuscript – 200 word limit/100 for Specials)
- manuscript files in Word, WordPerfect, RTF or Text formats
- figures/Images in TIF, EPS or JPG formats
- tables in XLS, CSV or DOC formats
- abstracts of any related papers that you have in press
- supplementary data files
- covering letter (which the referees will see).
(It is a good idea to put all your files in one folder.)

The submission package will guide you through the processes for submitting your files and confirmation/approval.

- You can check the status of your manuscript at any time.

Recommended utilities

- PC users: Internet Explorer 5.0 and above
- Mac users: Netscape 4.7 and above
- Adobe Reader 4.0 and above
- You need to have Cookies enabled.

Colour: It is possible to include colour versions of black and white printed figures in the online version at no cost if the same files can be used. There are charges for including colour in the print version. Estimates of likely costs can be obtained from the Staff Editor. There is a limited budget to assist authors who do not have funds for essential colour printing. Please ensure that colour files to be printed are saved as CMYK, not RGB.

Foldouts: These will be accepted only after consultation with the Editor, and you will be expected to cover the additional costs.

Offprints may be ordered on the form provided at proof stage. You will also be sent instructions on how to obtain a PDF file.

Discussion of papers: 1000-word discussions on papers that have already appeared in the *Journal* or appropriate Society books are acceptable. These should be submitted online.

Supplementary Publications: Limited space in the *Journal* means that detailed material, such as locality lists and analytical data, will be made available as Supplementary Publications. These files are hosted on the Society's website. Acceptable formats for the online repository are .rtf, .csv and .pdf. Maximum size is 5 MB per paper (can be zipped if necessary).

Editorial Enquiries: More information can be found at www.geolsoc.org.uk/jgs or contact the production editor, Hannah Sime (hannah.sime@geolsoc.org.uk), Geological Society Publishing House, Unit 7, Brassmill Enterprise Centre, Brassmill Lane, Bath BA1 3JN, UK (tel: 01225 476411).

Index

- Acadian, deformation in Welsh Basin 1107–1120
accretionary history, Altai-East Junggar 1311–1321
AFTA, (discussion) 1225–1226, 1226–1228
Altaids
 crust mantle relations 995–1000
 mineralization style 1311–1321
Altiplano (Chile), canyon incision 1047–1060
Anaran anticline, 3-D structure 769–782
Anatolia, uplift and weathering history 927–940
Ancient Gneiss Complex, zircon ages 953–963
Andaman ophiolite, geochemistry and petrology 1031–1045
Andes (Bolivia), Cenozoic uplift 1079–1092
andesites, Rhynie Basin 863–872
anisotropy of magnetic susceptibility (AMS), Mourne Granite Centres 831–836
apatite fission track analysis
 South Cycladic Detachment System 751–768
 West Greenland landscape 817–829
Apennines, structure and kinematics 179–190
Appalachian Orogen, provenance studies 309–318
⁴⁰Ar/³⁹Ar age
 Barrovian metamorphism in Scotland 133–146
 Stoer Group impact deposits 349–358
 structures in Nordfjord 887–898
Arauco Peninsula, offshore slope failures 1237–1248
Archaean
 Karelia 201–218
 Zimbabwe Carton growth 941–952
architecture, sedimentary 625–628
Arctic Ocean, opening 1093–1106
Argentina, Gondwana docking evidence 1061–1071
Ashele basalt 995–1000
Atlantic Ocean
 break-up in NE 27–48
 marginal post-rift compression in NE 1249–1263
 North Atlantic Igneous Province 159–178
Australia
 Grenville-age orogenesis 251–264
 Neoproterozoic loess 289–307
Avalonia, SPICE 851–861
Aves Ridge 333–347
Azerbaijan mud volcanoes 49–60, 1013–1030

Baltican Terrane 15–26
Barrovian metamorphism, Scotland 115–132, 133–146, 1265–1284
Barrovian zones, P-T evolution 1147–1166
basaltic lavas, Faroe Islands 159–178
basement, Norwegian margin 1167–1185
basin architecture, Zagros 235–250
basins, sediment transport 1121–1132
¹⁰Be age, strath terrace dating in Himalaya 783–804
Beiyan volcano 1201–1214
Betic Cordillera, deformation and transpression 373–382
Bizigou Formation 1215–1224
Bolivia, Cenozoic uplift 1079–1092
Borneo, Cenozoic sediment flux 1187–1200
Briksdalsbreen, break-up and climate change 673–688
Britain
 chronology of Cambrian succession 705–716
 LISPB 61–82
brittle tectonics, Zagros fold-and-thrust belt 979–994

 $\delta^{13}\text{C}$
 Avalonia 851–861
 Nuccaleena Formation 289–307
Cabo Ortegal Complex, Purrido Ophiolite 733–750
Calabrian, highstand in Malta 913–925
Çaldag ophiolite, uplift and weathering history 927–940
Caledonian, transpressional tectonics in Spitsbergen 441–456
Caledonian Orogeny and Caledonides
 East Greenland evidence for terrane transfer 15–26
 Jaeren nappe provenance 423–439
 Moine Thrust Zone development 99–114
 Norwegian margin basement 1167–1185
 Shetland Islands 1265–1284
Cambrian
 chronology in southern Britain 705–716
 Gondwana docking evidence 1061–1071
 peri-Gondwana Basin 83–98
 SPICE in Avalonia 851–861
Campanian Volcanic Zone, modelling eruption behaviour 471–484
Canada, Arctic, Pennsylvanian palynology 559–569, 571–584
canyons, incision in Altiplano 1047–1060
cap carbonates 805–815
carbonate deposits, hot springs on Savo 1297–1310
Carboniferous
 Altaid mineralization 1311–1321
 Central Wales ore deposits 1107–1120
 dyke swarm on Orkney 1233–1236
 thickening upward sequences 319–331
 see also Mississippian; Pennsylvanian
Caribbean Sea, plate interaction 333–347
cathodoluminescence imaging, zircon source studies 309–318
Cenozoic
 Bolivian Andes uplift 1079–1092
 provenance studies in Pakistan 499–516
 uplift and weathering in Anatolia 927–940
 see also Palaeogene; Neogene
Central Asian Orogenic Belt (CAOB), crust mantle relations 995–1000
Chalk Group, geomorphology and sedimentology 393–405
channel-levee systems evolution 625–628
Chile
 Altiplano canyon incision 1047–1060
 Pleistocene slope failure offshore 1237–1248
China
 cap carbonates 805–815
 crust mantle relations in Altaids 995–1000
 flow in felsic dykes 1001–1011
 mineralization in Altaids 1311–1321
 Permian floras 607–619
 Permian volcanoes of Inner Mongolia 525–543
CL imaging, zircon source studies 309–318
clay, creep and rapid failure 359–371
Cleveland Basin, sediment transport 1121–1132
climate change 545–546
 floral indicators in Permian 607–619
 glacier break-up in Norway 673–688
 relation to canyon incision 1047–1060
 see also palaeoclimate
coal seams, hiatal surfaces 629–632
Comley Sandstone Formation 705–716
compression and compressional tectonics
 High Ardenne slate belt 407–422

- Persian Gulf 485–498
 post-rift of Iberian margin 1249–1263
 cone sheets, structure in Scotland 689–704
 conifers, Pennsylvanian of Canada 571–584
 craters, impact 1–14
 creep behaviour, Mam Tor landslide 359–371
 Cretaceous
 Caribbean-Colombian Oceanic Plateau 333–347
 deformation in Persian Gulf 485–498
 folding in the Zagros 235–250
 inversion events in Spain 899–912
 rifting in North Greenland 1093–1106
 sediment flux in SE Asia 1187–1200
 crust-mantle relations, Altaids 995–1000
 crustal reworking, Archaean of Swaziland 953–963
 crustal shortening/thickening 333–347, 1079–1092
 crustal thinning/melting, Iberian Pyrite Belt 717–731
 Cryogenian, geochemical evidence of cap carbonates 805–815
 Cuillin Complex, cone sheet structure 689–704
 Cyprus, Troodos Massif uplift 457–470
- Dalradian Supergroup 1133–1146
 Dead Sea fault (discussion) 621–623, 623–624
 deep sea sedimentation 319–331
 deformation
 Betic Cordillera 373–382
 Persian Gulf 485–498
 Devonian
 Central Wales ore deposits 1107–1120
 magmatism in Spain 733–750
 Rhynie Chert Konservat-Lagerstätte 863–872
 transpressional tectonics in Spitsbergen 441–456
 Devonian-Carboniferous boundary 547–557
 diffusion, metamorphic garnets 115–132
 discussions
 Dead Sea fault in Syria 621–623, 623–624
 NW Scotland exhumation episodes 1225–1226, 1226–1228
 displacement, Quaternary faulting in Korea 273–288
 Dorood anticline 219–234
 Doushantuo cap carbonates 805–815
 dykes
 emplacement mechanics 965–978
 flow structures 1001–1011
 lamprophyre on Orkney 1233–1236
- East Junggar arc, mineralization 1311–1321
 eclogite, Jaeren nappe 423–439
 Ediacaran Period, climate change 289–307
 emplacement
 magma movement in Mourne granites 831–836
 mechanisms for dykes 965–978
 Tyrone Igneous Complex 837–850
 England, Mam Tor landslide 359–371
 eruption duration estimate, LUSI mud volcano 517–523
 Eu anomaly, cap carbonates 805–815
 Eupcheon Fault 273–288
 exhumation
 history in Scotland (discussion) 1225–1226, 1226–1228
 Jaeren nappe 423–439
 extension, Mesozoic in Iran 979–994
 extension faults, effect on Campanian Volcanic Zone 471–484
 extinction, floras 607–619
 extrusion, continental 633–672
- failure
 Mam Tor landslide 359–371
 offshore southern Chile 1237–1248
 Faroe Islands
 intrusive styles 159–178
 structural evolution 27–48
 faults
 effect on Campanian Volcanic Zone 471–484
 modelling in Messina Straits 191–199
 offset (discussion) 621–623, 623–624
 rupture history 273–288
 South Cycladic Detachment System 751–768
 Fennoscandian Shield 201–218
 floras, extinction and radiation 607–619
 flow structures, felsic dykes 1001–1011
 fluid inclusion analysis, K-feldspars in Stoer Group 349–358
 fluvial activity *see* rivers
 fold history
 Dorood anticline 219–234
 Zagros 235–250
 forests, Pennsylvanian 585–605
 Fulmar Formation, porosity study 1285–1295
 Furongian, SPICE in Avalonia 851–861
- garnet, Mn zoning profiles 115–132
 Gawler Craton 251–264
 geochemistry
 Andaman ophiolite 1031–1045
 Caribbean Sea 333–347
 Cryogenian cap carbonates 805–815
 Dalradian metavolcanics 1133–1146
 felsic volcanics in Spain 717–731
 metamorphic garnets 115–132
 Norwegian margin basement 1167–1185
 Permian volcanics of Mongolia 525–543
 Purrido Ophiolite 733–750

Zagros foreland basin 235–250
Zagros Mountains, Mesozoic extension and rifting 979–994
Zhongtiao Group 1215–1224
Zimbabwe Craton, late Archaean growth 941–952
zircon age 15–26
 Ancient Gneiss Complex 953–963
 Appalachian Orogen 309–318
 British Cambrian succession 705–716
 Caribbean-Colombian Oceanic Plateau 333–347
 Kap Washington Group 1093–1106
 Karelia 201–218
 Meguma terrane 83–98
 Norwegian margin basement 1167–1185
 Orkney dyke swarm 1233–1236
 Purrido Ophiolite 733–750
 Rheic Ocean closure evidence 383–392
 Río de la Plata craton 1061–1071
 sediment flux and provenance in Java 1187–1200
 Tyronne Igneous Complex 837–850
 Zhongtiao Group 1215–1224
 Zimbabwe Craton 941–952
zircon FTA, South Cycladic Detachment System 751–768
zoning, Mn in garnet 115–132

JOURNAL OF
THE GEOLOGICAL SOCIETY

Volume 168 2011

Chief Editors: Dr R. Strachan and Dr Q. Crowley

Editors: Dr G. I. Alsop, Dr R. Anczkiewicz, Dr B. R. Bell, Dr B. Bingen, Dr E. Bozkurt, Dr A. Carter, Professor M. Cho, Dr C. Clark, Dr A. Collins, Professor P. Donoghue, Dr G. J. Hampson, Dr J. Hendry, Dr J. E. A. Marshall, Dr K. J. W. McCaffrey, Dr T. Needham, Dr E. Platzman, Dr D. Pyle, Dr I. Sansom, Dr S. C. Sherlock, Dr M. J. Whitehouse, Dr J. C. Woodward.

Advisory Editors: Professor J. Blundy, Professor J. S. Daly, Professor T. Elliot, Dr R. W. England, Dr I. C. W. Fitzsimons, Professor H. Fossen, Dr D. A. T. Harper, Professor B. P. Kokelaar, Professor R. D. Law, Professor V. Pease, Professor V. Ramos, Professor R. W. Renaut, Professor H. R. Rollinson, Professor K. Schulmann, Professor J. D. Scourse, Dr C. van Staal, Professor M. K. Watkeys, Professor W. Xiao.

But if any human being earnestly desire to push on to new discoveries instead of just retaining and using the old; to win victories over Nature as a worker rather than over hostile critics as a disputant; to attain, in fact, clear and demonstrative knowledge instead of attractive and probable theory; we invite him as a true son of Science to join our ranks.

[BACON, *Novum Organum, Prefatio*. 1620]

Thematic sets of papers in Volume 168

Thematic Set: Late Palaeozoic terrestrial habitats and biotas: the effect of changing climates (Part 2)

Dates of issue of Volume 168

Part 1 (for January):	pages 1–288	6 January 2011
Part 2 (for March):	pages 289–624	25 February 2011
Part 3 (for May):	pages 625–816	27 April 2011
Part 4 (for July):	pages 817–1072	15 June 2011
Part 5 (for September):	pages 1073–1232	30 August 2011
Part 6 (for November):	pages 1233–1328	14 October 2011

VERDECCHIA, S.O., CASQUET, C., BALDO, E.G., PANKHURST, R.J., RAPELA, C.W., FANNING, M. & GALINDO, C. Mid- to Late Cambrian docking of the Río de la Plata craton to southwestern Gondwana: age constraints from U–Pb SHRIMP detrital zircon ages from Sierras de Ambato and Velasco (Sierras Pampeanas, Argentina)	1061
VIETE, D.R., FORSTER, M.A. & LISTER, G.S. The nature and origin of the Barrovian metamorphism, Scotland: $^{40}\text{Ar}/^{39}\text{Ar}$ apparent age patterns and the duration of metamorphism in the biotite zone	133
VIETE, D.R., HERMANN, J., LISTER, G.S. & STENHOUSE, I.R. The nature and origin of the Barrovian metamorphism, Scotland: diffusion length scales in garnet and inferred thermal timescales	115
VORHIES, S.H. & AGUE, J.J. Pressure–temperature evolution and thermal regimes in the Barrovian zones, Scotland	1147
WALDRON, J.W.F., SCHOFIELD, D.I., WHITE, C.E. & BARR, S.M. Cambrian successions of the Meguma Terrane, Nova Scotia, and Harlech Dome, North Wales: dispersed fragments of a peri-Gondwanan basin?	83
WALKER, R.J., HOLDSWORTH, R.E., IMBER, J. & ELLIS, D. Onshore evidence for progressive changes in rifting directions during continental break-up in the NE Atlantic	27
WAN, B., XIAO, W., ZHANG, L., WINDLEY, B.F., HAN, C. & QUINN, C.D. Contrasting styles of mineralization in the Chinese Altai and East Junggar, NW China: implications for the accretionary history of the southern Altai	1311
WILKINSON, M. & HASZELDINE, R.S. Oil charge preserves exceptional porosity in deeply buried, overpressured, sandstones: Central North Sea, UK	1285
WOODS, M.A., WILBY, P.R., LENG, M.J., RUSHTON, A.W.A. & WILLIAMS, M. The Furongian (late Cambrian) Steptoean Positive Carbon Isotope Excursion (SPICE) in Avalonia	851
XIAO, Y. & ZHANG, H.-F. Effects of melt percolation on platinum group elements and Re–Os systematics of peridotites from the Tan-Lu fault zone, eastern North China Craton	1201
YOUNG, D.J., HACKER, B.R., ANDERSEN, T.B. & GANS, P.B. Structure and $^{40}\text{Ar}/^{39}\text{Ar}$ thermochronology of an ultrahigh-pressure transition in western Norway	887
YUAN, C., SUN, M., XU, Y., ZHAO, G., XIAO, W., LONG, X. & YIN, J. Oceanic lithospheric mantle beneath the continental crust of the Chinese Altai	995
ZEH, A., GERDES, A. & MILLONIG, L. Hafnium isotope record of the Ancient Gneiss Complex, Swaziland, southern Africa: evidence for Archaean crust–mantle formation and crust reworking between 3.66 and 2.73 Ga	953
ZHANG, X., WILDE, S.A., ZHANG, H. & ZHAI, M. Early Permian high-K calc-alkaline volcanic rocks from NW Inner Mongolia, North China: geochemistry, origin and tectonic implications	525
Discussion	
WESTAWAY, R. Discussion of ‘Geological offsets and age constraints along the northern Dead Sea fault, Syria’	621
SEARLE, M.P., CHUNG, S.-L. & LO, C.-H. Reply to Discussion on ‘Geological offsets and age constraints along the northern Dead Sea fault, Syria’	623
HUDSON, J.D. Discussion on ‘Multiple post-Caledonian exhumation episodes across NW Scotland revealed by apatite fission-track analysis’	1225
HOLFORD, S.P. Reply to Discussion on ‘Multiple post-Caledonian exhumation episodes across NW Scotland revealed by apatite fission-track analysis’	1226

Referees for papers over the last 12 months

The following are thanked for the reports on scripts submitted to the *Journal*

Aldanmaz, Ercan	Dore, A.G.	Lamb, Simon	Rollinson, Hugh
Alegret, Laia	Draper, Grenville	Lee, Jeff	Rowland, Julie
Alsop, Ian	Dupont-Nivet, Guillaume	Liati, Anthi	Russell, Kelly
Anderson, Tom	Elliott, Crawford	Lissenberg, C Johan	Scandone, Paolo
Archanjo, Carlos J.	Emeleus, Henry	Lockley, Martin	Schersten, Anders
Argles, Tom	Etiopo, Giuseppe	Lorand, Jean-Pierre	Schulmann, Karel
Authemayou, Christine	Faithfull, John	Lucas, Spencer	Schwartz, Joshua
Back, Stefan	Fedo, Chris	Mac Niocaill, Conall	Schwenzer, Susanne
Ball, Philip	Flowerdew, Michael J.	Macdonald, Ray	Seltmann, Reimar
