Volume 176, Part 6, November 2019

Review Focus article

The Sirius Passet Lagerstätte of North Greenland: a remote window on the Cambrian Explosion

Research articles

FOOTE, M., SADLER, P. M., COOPER, R. A. & CRAMPTOM, J. S.
Completeness of the known graptoloid palaeontological record

Woroninae typovi (Acritarchida: Praeacritarchs): A new genus and species from the Lower Cambrian of Brazil

DORSON, M. R. & O’LEAR Y, D.
Sediment delivery and depositional processes along the eastern Aleutian Trench

JESS, S., STEPHENSON, R., NIELSEN, S. B. & BROWN, R.
The source of topography across the Cumberland Peninsula, Baffin Island, Arctic Canada: differential exhumation of a North Atlantic rift flank

Stable isotopes of nonsulphide Zn–Pb ores in Britain and Ireland: fluid characteristics and paleoclimatic variability

FRANKLIN, J., TYRELL, S., MORTON, A., FREI, D. & MARK, C.
Triassic sand supply to the Slyne Basin, offshore western Ireland – new insights from a multi-proxy provenance approach

BULLOCK, L., PARNELL, J., MUIRHEAD, D., ARMSTRONG, J., SCHITO, A. & CORRADO, S.
A thermal maturity map based on vitrinite reflectance of British coals

ATAR, E., MÄRZ, C., SCHNETGER, B., WAGNER, T. & APLIN, A.
Local to global controls on the deposition of organic-rich muds across the Late Jurassic Laurasian Seaway

DAVIES, N. S., SHELITO, A. P. & McMAHON, W. J.
Where does the time go? Assessing the chronostratigraphic fidelity of sedimentary geological outcrops in the Pliocene–Pleistocene Red Rup Formation, England

LEFRONT, J.-P., MONNIER, J.-L. & DANUKALOV, G.
Transport of Late Pleistocene loess particles by katabatic winds during the lowstands of the English Channel

BOLOGHERE, M., GOMEZ-GRAS, D., STOCKELL, D. F., TEIXEIRA, A., BOVA, S. & REMACHA, E.
Detrital zircon U–Pb insights into the timing and provenance of the South Pyrenean Jaca basin

PIERANTONI, P. P., CHICCO, J., COSTA, M. & INVERNIZZI, C.
Plio-Quaternary transpressive tectonics: a key factor in the structural evolution of the outer Apennine–Adriatic system, Italy

WANG, A., MIN, K., WANG, G., CAO, K., SHEN, T., JIANG, P. & WEI, J.
Slow exhumation of the Greater Himalaya in the Yarlung region, the transition between the central and Eastern Himalaya, during the late Neogene

SUN, S., DONG, Y., HE, D., CHEN, C. & LIU, X.
Thickening and partial melting of the Northern Qinling Orogen, China: insights from zircon U–Pb geochronology and Hf isotopic composition of magmatites

WU, K., TIAN, L., LIANG, L., METCALFE, I., CHU, D. & TONG, J.
Recurrence of biotic rebounds during the Early Triassic: biostatigraphy and temporal scale size variation of conodonts from the Nanpanjiang Basin, China

PIRANTONI, P. P., CHICCO, J., COSTA, M. & INVERNIZZI, C.
Plio-Quaternary transpressive tectonics: a key factor in the structural evolution of the outer Apennine–Adriatic system, Italy

MANTOVANI, E., VITI, M., BARBACCA, D., TAMURELLI, C. & CENNI, N.
How and why the present tectonic setting in the Apennine belt has developed

Thematic collection: Apennines-Tyrrhenian system

BROGI, A. & PROSSER, G.
Introduction to the thematic collection ‘Apennines-Tyrrhenian system’

SPICA, A., CAPEZZULLI, E., BROGI, A., CIBILLI, S. & LIOTTI, D.
Mit to late Permian microfloristic evidence in the metamorphic successions of the Northern Apennines: insights for age-constraining and palaeogeographical correlations

PERRONITI, P. P., CHICCO, J., COSTA, M. & INVERNIZZI, C.
Plio-Quaternary transpressive tectonics: a key factor in the structural evolution of the outer Apennine–Adriatic system, Italy

SAVASTANO, L. & PIANA AGOSTINETTI, N.
Deep structure of the Southern Apennines as imaged by active and passive seismic data along the CROP-04 (crustal) reflection seismic profile

MANTOVANI, E., VITI, M., BARBACCA, D., TAMURELLI, C. & CENNI, N.
How and why the present tectonic setting in the Apennine belt has developed

Cover image: A micro landscape photographed on an exposed quarry face of Ballachulish Slate Formation. The dark coloured mudstones contain Iron Pyrites (iron sulphide). This reacts with oxygen and water to form iron oxide (rust) and sulphuric acid. The acid reacts with any calcareous cement in the mudstone to form gypsum (hydrated calcium sulphate). This reaction is very important to engineering geologists as the acid attacks concrete and the gypsum causes heave.
