Research articles

MUÑOZ-GÓMEZ, M., FUENTES, C., FUENTES, F., TAPIA, F., BENOIT, M., FARIAS, M., FANNING, C. M., FOCK, A., CHARRIER, R., SELLÉS, D., & BUSTAMANTE, D.  Eocene arc petrogenesis in Central Chile (c. 33.6° S) and implications for the Late Cretaceous–Miocene Andean setting: tracking the evolving tectonic regime  258

BIRD, H. C., MILNER, A. C., SHILLITO, A. P., & BUTLER, R. J.  A lower Carboniferous (Visean) tetrapod trackway represents the earliest record of an edopoid amphibian from the UK  276

MCKELLAR, Z., PATTERSON, J. A., LIDSDOWN, E. S., & FREI, D.  A multidisciplinary approach to sediment provenance analysis of the late Silurian–Devonian Lower Old Red Sandstone succession, northern Midland Valley Basin, Scotland  297

ASKEW, A. J. & WELLMAN, C. H.  Reconstructing the terrestrial flora and marine plankton of the Middle Devonian of Spain: implications for biotic interchange and palaeogeography  315

SOFIONO, I., KIKUCHI, M., SLAMA, J., JANOUŠEK, V., & KOHUT, M.  Cambro-Ordovician anatexis and magmatic recycling at the thinned Gondwana margin: new constraints from the Kouřim Unit, Bohemian Massif  325

TAMAS, A., TAMAS, D. M., KREZSEK, C., SCHLIEDER, Z., PALLADINO, G., & BERCEA, R.  The nature and significance of sand intrusions in a hydrocarbon-rich fold and thrust belt: Eastern Carpathians Bend Zone, Romania  343

BLADES, M. L., ALESSIO, B. L., COLLINS, A. S., FOEDEN, J., PAYNE, J. L., GLORIE, S., HOLDEN, P., THORPE, B., & AL-KHIRBASH, S.  Unraveling the Neoproterozoic accretionary history of Oman, using an array of isotopic systems in zircon  357

NACHTERGAELE, S., GLORIE, S., MIDDLETON, C., CHARUSIRI, P., KANJANAPAYONT, P., VAN RANST, G., & MOYER, A.  Cenozoic tectonic evolution of southeastern Thailand derived from low-temperature thermochronology  395

BOYCE, A. J. & WELLMAN, C. H.  Reconstructing the terrestrial flora and marine plankton of the Middle Devonian of Spain: implications for biotic interchange and palaeogeography  412

HAOZHENG, W., OSCAR, L., HUAFENG, Z., HONG, Z., XI, C., & MINGGUO, Z.  Recognition and significance of c. 800 Ma upper amphibolite to granulite facies metamorphism in metasedimentary rocks from the NW margin of the Yangtze Block  424

Cover image: The intertidal zone at Fanore Beach is the perfect location for the combination of fossil hunting and sea creature viewing. The diversity of living and fossil organisms on display in the intertidal zone provides ample reward for an observer with a keen eye and a creative imagination. Visualizing marine life in the present allows for a clearer picture of life in the ancient oceans that existed throughout geological time. Photo: Martin Sykes.
