DISCUSSION OF PAPERS IN THE *QUARTERLY JOURNAL*

The pages of the *Quarterly Journal* are open for the discussion of papers which have already appeared in the *Journal*.

While every Fellow may contribute to these discussions, they are intended primarily for the benefit of Fellows (and particularly those resident overseas) who are unable to attend the meetings of the Society, and to afford such Fellows a closer contact with the Society's activities.

Contributions to these discussions should not as a rule exceed 250 words (half a page of the *Journal*), and they will be subject to editing by the Secretaries. They should be typewritten, and the title of the paper discussed, and the name of its author, appear plainly at the top of the typescript.

It will not be possible for the Secretaries to enter into correspondence about contributions or to submit proofs to the contributors.

Participation in the discussion at a meeting, and the publication of his remarks in the *Proceedings*, will not preclude a Fellow from making a contribution to the subsequent *Journal* discussion.

NOTICE TO INTENDING AUTHORS OF PAPERS

Authors proposing to submit papers for publication in the *Quarterly Journal* are advised to apply to the Assistant Secretary for a copy of the *Notes on the preparation of papers for publication in the Quarterly Journal*. The pamphlet sets out the Council's requirements in the typescript and illustration of papers submitted for publication and offers suggestions which should assist authors to comply with those requirements.

The Geological Society is a signatory to the **Fair Copying Declaration**, under which no objection is made to the making of *single copies* of parts of the Society's publications under certain limited and stated conditions. Details of the Declaration may be obtained from the offices of the **Royal Society**, Burlington House, London, W.1, upon application.

CONTENTS

	PAGE
1. J. Z. YOUNG. The evolution of vertebrate organization (Ninth William Smith Lecture)	1
2. K. S. SANDFORD. The geology of Isis Point, North-East Land (Spitsbergen). (Plate I)	11
3. J. SUTTON & J. WATSON. The structure and stratigraphi- cal succession of the Moines of Fannich Forest and Strath Bran, Ross-shire. (Plates II & III)	21
