

# ALPHABETICAL INDEX

TO

## PROCEEDINGS OF THE GEOLOGICAL SOCIETY.

The fossils referred to are described, and those of which the names are printed in italics are also figured.

- ABIES BENSTEDI**, n. s., 52.  
Age of the newest lava current of Auvergne, by Mr. Lyell, 75.  
Alabama, U.S., notice on the coal-fields of, by Mr. Lyell, 278.  
— on the cocene deposit there, 407.  
Alum Bay, Isle of Wight, Mr. Prestwich on, 223.  
Amber, Prof. Göppert on, 102.  
America, North, Dr. Dale Owen on the geology of the western states of, 433.  
— Mr. Lyell on the newer deposit in the southern states, 405.  
See also Alabama, Cape Breton, Frostburg, Massachusetts, Nova Scotia, Pennsylvania, St. Lawrence, &c.  
America, South. See Falkland Islands.  
Anniversary Meeting, Proceedings at, 141.  
Anniversary Address of the President, Leonard Horner, Esq., 145. See also Horner, Mr.  
Annual General Meeting of the Society, Proceedings at, 141.  
Anoplotherian tooth from Binstead, Isle of Wight, Prof. Owen on, 420.  
Apennine limestone of Lycia, 9.  
Asphalte pavements, geological position of the bitumen used in, 80.  
Atherfield, section of the greensand at, by Dr. Fitton, 55.  
Atherton, section of coal-measures and new red sandstone at, 22.  
Atlantic ocean, on fine dust falling in, 26.  
*Atrypa palmata*, sp. n., 276.  
Austen, Mr., on the coal-beds of Lower Normandy, 1.  
Auvergne, Mr. Lyell on the age of the newest lava current of, 75.  
Azores, Mr. Hunt on the geology of St. Mary's, one of this group, 39.  
*Balena definita*, ear-bone of, from the Ipswich Crag, 33.  
Balance sheet, 1846, xiii.  
Basaltic rocks of the Azores, 39.  
Bastenne, geological position of the bitumen found there, 80.  
Beloochistan hills, geological report on, by Capt. Vickary, 260.  
Binney, Mr., on the new red sandstone of Lancashire and Cheshire, 12.  
— on the Dukinfield Sigillaria, 390.  
Binstead, Isle of Wight, on the tooth of an Anoplotherian animal found there, 420.  
Birds, supposed footprints of, in the Hastings sand near Hastings, 267.  
— footsteps of, in the new red sandstone of Storton, 410.  
— supposed bones of, from the Wealden, by Prof. Owen, 96.  
— supposed fossil remains of, in the Wealden beds, by Dr. Mantell, 104.  
Black, Dr., remarks on a slab of new red sandstone with impressions of footsteps, 65.  
Black-lead, manufacture of solid masses from the powder, 31.  
Bognor beds, reference to, 237.  
Boulders on the banks of the St. Lawrence, 426.  
— scratched, and rocks of the coal-field of Scotland, 33.  
Bowerbank, Mr., on a new Pterodactyl from the Chalk, 7.  
Breton, Cape, Mr. Brown on erect fossil trees at, 393.  
Brockedon, Mr., on a method of forming the dust of Graphite into a solid mass, 31.  
Brook Point and Sandown Bay, Isle of Wight, notes on Iguanodon's bones found there, 91.  
Brongniart, M. Ad., note by him on the cast of a fossil fruit from the Kentish Rag, 52.  
Brown, Mr., on fossil trees at Cape Breton, 393.  
Buch, M. von, on a new family of Crioid animals (Cystidea), 11.

INDEX TO THE PROCEEDINGS.

- Buckland, Dr., on nodules found on the shores of Lough Neagh, 103.
- Bunbury, Mr., on fossil ferns found at Frostburg, Maryland, U.S., 82.
- on fossil plants from the coal formation of Nova Scotia, 136.
- Burmeister, Dr., notice of his work on Trilobites, 215.
- Calcareous band in the Plastic Clay, Mr. Rennie on, 260.
- Cambrian group of Prof. Sedgwick, 130, 289.
- Cape Breton, Mr. Brown on erect fossil trees there, 393.
- Carpolithes Smithie*, n. s., 53.
- Caryocrinus ornatus, notice of, 11.
- Cautley, Major, and Dr. Falconer, notice of their work, 219.
- Chalk, on a Pterodactyl from the, 7.
- Dr. Mantell on fossilfruits from, 51.
- Charlton, Mr., on the discovery of the tusk of an elephant in the gravel near Rochester, 32.
- Cheshire, Mr. Binney on the new red sandstone of, 12.
- footmarks in the new red sandstone of, 65.
- Chirotherian impressions in the coal-measures of Pennsylvania, 418. *See also* Footprints.
- Choin-batârd, fossils of, 5.
- Chonetes Falklandica*, n. sp., 274.
- Classification of the fossiliferous slates of Cumberland, &c., by Prof. Sedgwick, 106.
- Cleavage planes, direction of, in North Wales, 315.
- Coal of Formosa, notice of its existence, 81.
- Coal-beds of Lower Normandy, 1.
- Coal-field, Scottish, scratched boulders and rocks from, 33.
- Lancashire, general description of, 13.
- Alabama, U.S., Mr. Lyell on, 278.
- Mr. Brown on erect fossil trees found at Sydney, Cape Breton, 393.
- Coal fossils of Nova Scotia, notices of, 132; notes on, by Mr. C. J. F. Bunbury, 136.
- Coal-measures of Pennsylvania, U.S., Mr. Lyell on the footsteps of animals in, 417.
- Coal period, temperature of, 87.
- Collyhurst, section of coal-measures and new red sandstone at, 20.
- Coniferous wood in the coal formation of Nova Scotia, 133.
- Cooper, Mr., notice of coal found at Formosa, 81.
- Council, report, 1846, i.
- Crag of Ipswich, whale's ear-bone found in, by Mr. Rose, 32.
- Creseis ventricosa*, sp. n., 314.
- Creseis obtusa*, sp. n., 314.
- Creseis gracillima*, sp. n., 314.
- Cretaceous beds of Lycia, account of, by Lt. Spratt and Prof. E. Forbes, 9.
- Crinoids, M. von Buch on a new family of, 11.
- Cumberland, Prof. Sedgwick on the classification of the fossiliferous slates of, 106.
- Cumming, Mr., on the geology of the Isle of Man, 317.
- Cunningham, Mr., on the footsteps of birds in the new red sandstone of Storton, 410.
- Cutch, notice of an earthquake in, by Capt. Nelson, 103.
- Cystidea, M. von Buch on, 11.
- Danæites asplenioides *var.* major, 85.
- Darwin, Mr., on fine dust falling on vessels in the Atlantic, 26.
- notice of his researches, 193.
- on the geology of the Falkland Islands, 267.
- Davis, Mr., on the geology of the neighbourhood of Tremadoc, 70.
- Dawes, Mr., on Sternbergiæ, 139.
- Dawson, Mr., on fossils of the coal formation of Nova Scotia, 132.
- Deane, Dr. J., on footprints on new red sandstone, collected by him, 38.
- Detritus, superficial, of Sweden, Sir R. Murchison on, 349.
- Dichobune cervinum*, Prof. Owen on an upper molar tooth of, from Binstead, Isle of Wight, 420.
- Dickinson, Mr., on the strata called 'Jackstones' at Merthyr Tydvil, 131.
- Donations to the Library of the Geological Society in the year 1845, 56; in 1846, 449.
- Drift, Scandinavian, Sir R. Murchison on, 349.
- Dukinfield, Mr. Binney on a Sigillaria found there, 390.
- Durocher's memoir on the Scandinavian drift, reference to, 354.
- Dust, fine, falling on vessels in the Atlantic, Mr. Darwin on, 26.
- Ear-bone of whale, found in Ipswich Crag, notice of, by Mr. Rose, 32.
- Earthquake, notice of, in Cutch, by Capt. Nelson, 103.
- Ehrenberg, Prof., on the fine dust that falls on vessels in the Atlantic, and the infusoriæ it contains, 28.
- Elephant's tusk in Rochester gravel, by Mr. Charlton, 32.
- Elevations, successive, at Gibraltar, no-

INDEX TO THE PROCEEDINGS.

- time of, by Mr. Smith of Jordan Hill, 44.
- Erect fossil trees at Sydney coal-field, Cape Breton, Mr. Brown on, 393.
- Everest, Mr., on the level of the Piræus Harbour near Athens, 32.
- Falkland Islands, Mr. Darwin on the geology of, 267.
- Messrs. Morris and Sharpe on fossil brachiopodous shells from, 274.
- Ferns, fossil, from Frostburg, Maryland, 82.
- Fitton, Dr., account of the Atherfield section, Isle of Wight, 55.
- his speech on returning thanks on the part of Mr. Lonsdale on receiving the Wollaston medal for that gentleman, 141.
- Footprints in new red sandstone of Massachussetts, U.S., 38.
- slab containing them, from the new red sandstone of Cheshire, described by Dr. Black, 65.
- supposed, in the Hastings sand, near Hastings, 267.
- (birds) in the new red sandstone of Storton, 410.
- chirotheroid animals in the Pennsylvania coal-measures, 417.
- Foraminifera, new fossil species from the lias, by Mr. Strickland, 30.
- Forbes, Prof. E., and Lieut. Spratt on the geology of Lycia, 8.
- Forbes, Prof. E., his list of the Pleistocene fossils of the Isle of Man, 346.
- Formosa, coal found at, 81.
- Fossiliferous slates of Cumberland, &c., Prof. Sedgwick on the classification of, 106.
- Fossils (Silurian) of Tremadoc slates, 70.
- of Cumberland, &c., 123.
- of North Wales, 314.
- the Cystidea, 11.
- (?) of the Falkland Islands, 267.
- (Carboniferous) of Nova Scotia, 132, 136.
- of Frostburg, 82.
- of Cape Breton, 393.
- See Footprints, and Sigillaria, Stigmara, &c.
- (New red sandstone). See Footprints.
- (Lias) of Gloucester, 30.
- (Wealden) of the Isle of Wight, 91.
- (Lower greensand) fruits, 51.
- (Tertiary) of Auvergne, 75.
- of the Isle of Man, 346.
- in amber, Prof. Göppert on, 102.
- Indian, from Beloochistan, 266.
- Frostburg, Maryland, U.S., Mr. Bunbury on fossil ferns found there, 82.
- Fruits, fossil, from the Cretaceous rocks of the S.E. of England, 51.
- Georgia, U.S., Mr. Lyell on newer deposits there, 405.
- Gibraltar, on the geology of, 41.
- Glaciers, their action in Scandinavia, 377.
- Göppert, Prof., on amber, 102.
- Gothland, Sir R. Murchison on the drift of, 359.
- Granite of Lundy Island and Hestercombe, Rev. D. Williams on, 68.
- Graphite, Mr. Brockedon on a method of forming its dust into a solid mass, 31.
- Gravel of Rochester, Mr. Charlton on an elephant's tusk from, 32.
- Greensand, Lower, fossil fruits from, 51.
- account of the section at Atherfield, Isle of Wight, 55.
- Hampshire basin, Mr. Prestwich's remarks on, 223.
- Hastings sand, Mr. Tagart on markings in the, 267.
- Hestercombe (in the Quantock Hills), Rev. D. Williams on the granite of, 68.
- Horner, Mr., Address on delivering the Wollaston medal awarded to Mr. Lonsdale, 141. Anniversary address, Feb. 1846. *Notices of deceased Fellows*: Dr. MacDonnell, 145; M. Monticelli, 146. *Notice of Library and Museum*, 147. *Quarterly Journal*, 149. *Transactions*, 151. *Geological Survey of Great Britain*, 151. Notice of Sir R. Murchison's work on Russia, 154. General account of the geology of Russia, 156. Silurian rocks, 159. Notice of Prof. Sedgwick's papers, 162. Silurian rocks of N. America, 164. Devonian rocks, 165. Carboniferous series, 169. Theories of the formation of coal, 170. Permian system, 181. *The Secondary rocks*: Russian secondary rocks, 183. Cretaceous rocks of Russia, 184. Of North America, 184. *Tertiary deposits*, 185. *Metamorphic rocks*, 186. Russian metamorphic rocks, 188. American metamorphic rocks, 190. Metallic products, 192. *Changes in the relative level of land and sea*, 192. Mr. Darwin's researches, 193. Russian changes, 194. American changes, 196. *Boulder formations and erratic blocks*, 199; in Russia, 200; in Denmark, 202; in Sweden and Norway, 204; in North America, 205. *Glacier action*, 206. Mr. Hopkins's opinion, 208. *Paleontology*, 209. Association of Belemnites with

INDEX TO THE PROCEEDINGS.

- coal plants, 210. Permian plants of Russia, 212. Fossil plants of Australia, 212. M. von Buch's memoir on the Cystidea, 213. M. Agassiz's work on the identification of tertiary shells, 214. M. Burmeister's work on Trilobites, 215. M. Agassiz on the characters of fishes of the Old red sandstone, 216. Prof. Owen's work on British fossil Mammalia and Birds, 216. Capt. Cautley and Dr. Falconer's work on the Sewalik fossils, 219. *Conclusion*, 220.
- Hunt, Mr., on the geology of St. Mary's, one of the Azores, 39.
- Huyton, new red sandstone and coal-measures near, 25.
- Ice, on the packing of, in the St. Lawrence, 422.
- Icebergs, their agency in distributing the northern drift, 369.
- Ich nolites in the coal formation of Nova Scotia, 132.
- Igneous rocks of Lycia, 10.  
 ——— of the Azores, 39.  
 ——— of North Wales, 303.
- Iguanodons, Dr. Mantell on the bones of, found at Brook Point and Sandown Bay, 91.
- Illinois coal-field, notice of, 434.
- Indian geology, notice concerning the Beloochistan hills, 260.
- Indus, supposed subsidence of land at the mouth of, 103.
- Infusorial dust falling on vessels in the Atlantic, 26.
- Iowa, mines of, 443.
- Ipswich Crag, on a whale's ear-bone there, 32.
- Isle of Man. *See* Man, Isle of.
- Isle of Wight. *See* Wight, Isle of.
- 'Jackstones,' on the strata so called, at Merthyr Tydvil, 131.
- Kentish Rag, fossil fruits from, 52.
- Lancashire, Mr. Binney on the new red sandstone of, 12.  
 ——— Professor Sedgwick on the classification of the fossiliferous slates of, 106.  
 ——— general description of the coal-field of, 13.
- Landslips in the modern deposits of the St. Lawrence, 429.
- Lava current (newest) of Auvergne, Mr. Lyell on its age, 75.
- Lias, Mr. Strickland on two species of microscopic shells found in, 30.
- Library Committee, Report, 1846, iii.
- Lingula bed of Tremadoc, 70.
- Littry coal-field, notice of, by Mr. Austen, 2.
- Logan, Mr., on the packing of ice in the river St. Lawrence, the landslips in its valley, and marine shells there and in the mountain of Montreal, 422.
- Lonsdale, Mr., award of the Wollaston Medal to, 141.
- Lower greensand. *See* Greensand.
- Lundy Island, Rev. D. Williams's remarks on the granite of, 68.
- Lycia, Prof. E. Forbes and Lieut. Spratt on the geology of, 8.
- Lyell, Mr., on the age of the several lava currents of Auvergne, 75.  
 ——— on the coal-fields of Alabama, 278.  
 ——— on the newer deposits in the southern states of North America, 405.  
 ——— on the footmarks in the Pennsylvanian coal-measures, 417.
- Maidstone, fossil fruit from the Kentish Rag near, 52.
- Man, Isle of, Mr. Cumming on the geology of, 317.  
 ——— list of tertiary fossils of, by Prof. Forbes, 346.
- Manchester, section of coal-measures and new red sandstone in, 19.
- Mantell, Dr., on the footprints on the new red sandstone collected by Dr. J. Deane, 38.  
 ——— on some fossil fruits from the chalk formation of the south-east of England, 51.  
 ——— on the Wealden strata of the Isle of Wight, 91.  
 ——— on supposed fossil birds in the Wealden, 104.
- Marine shells in the mountain of Montreal, 461.
- Massachusetts, U.S., footmarks from the new red sandstone of, 38.
- Merthyr Tydvil, on the strata called 'Jackstones' at, 131.
- Microscopic shells found in the lias, 30.
- Mines of Iowa and Wisconsin, U.S., 443.
- Modern deposits of the St. Lawrence, on landslips in, 429.
- Montreal, boulders near, 426; marine shells in the mountain of, 431.
- Morris, Mr., on fossils from the Falkland Islands, 274.  
 ——— on the subdivision of the genus *Terebratula*, 382.  
 ——— and Mr. Prestwich on the Wealden strata in the Tunbridge Wells Railway, 397.
- Murchison, Sir R. I., on the superficial detritus of Sweden, &c., 349.  
 ——— notice of his work on Russia, 154.
- Museum Committee, Report, 1846, iii.
- Nelson, Capt., notice of an earthquake in Cutch, 103.

INDEX TO THE PROCEEDINGS.

- Neocomian beds, notice of, 55. *See also* Greensand, Lower.
- New red sandstone of Lancashire and Cheshire, Mr. Binney on, 12.
- Dr. Black on a slab with footsteps from the, 65.
- New red sandstone of Storton, Mr. Cunningham on the footsteps of birds there, 410.
- of Massachusetts, U.S., Dr. Mantell on footprints from, 38.
- Newest lava current of Auvergne, Mr. Lyell on, 75.
- Nodules found on the shore of Lough Neagh, Dr. Buckland on, 103.
- Norbury, section of coal-measures and new red sandstone at, 18.
- Normandy, Lower, Mr. Austen on the coal beds of, 1.
- North Wales, Mr. Sharpe on the geology of, 283.
- Nova Scotia, notices of fossils found in the coal formation of, by Mr. Dawson, 132; notes on the same fossils by Mr. Bunbury, 136.
- Nummulitic formation of the southern states of North America, 409.
- Ohio coal-field, notice of, 435.
- Ophite, eruption of bitumen contemporaneous with, 81.
- Orbis infimus*, n. sp., 30.
- Ornithichnites from Massachusetts, U.S., 38.
- Orthis concinna*, n. sp., 275.
- Orthis Sulivani*, n. sp., 275.
- Orthis tenuis*, n. sp., 275.
- Osar, their nature, 350.
- Owen, Dr. Dale, on the geology of the western states of North America, 433.
- Owen, Prof., on supposed birds' bones from the Wealden, 96.
- notice of his "British Fossil Mammals," 216.
- on an Anoplotherian tooth from Binstead, Isle of Wight, 420.
- Packing of ice in the river St. Lawrence, Mr. Logan on, 422.
- Palæozoic rocks of the Isle of Man, 317.
- Patricroft, section of coal-measures and new red sandstone at, 21.
- Pavements, asphalté, geological position of the bitumen used in, 80.
- Pecopteris elliptica*, n. sp., 84.
- Pecopteris emarginata*, 84, 90.
- Pendleton, section of coal-measures and new red sandstone at, 21.
- Pennsylvania, U.S., Mr. Lyell on footmarks in the coal-measures of, 417.
- Petro-tympanic bone of whale from the Ipswich Crag, 32.
- Physical geology of Lycia, 10.
- Physical geology of Gibraltar, 44.
- Piræus Harbour near Athens, Mr. Everest on the level of, 32.
- Plastic Clay, Mr. Rennie on a calcareous band in, 260.
- Pleistocene fossils of the Isle of Man, 346.
- Plesiosaurus, Mr. Stutchbury on a new species of (*P. megacephalus*), 411.
- Plessis coal-field, notice of, by Mr. Austen, 3.
- Polymorphina liassica*, n. sp., 30.
- Pratt, Mr., on the geological position of the bitumen used in asphalté pavements, 80.
- Prestwich, Mr., on the Tertiary formations of the Isle of Wight, 223.
- Prestwich, Mr., and Mr. Morris on the Wealden strata of the Tunbridge Wells Railway, 397.
- Pterodactylus giganteus*, 7.
- Pterodactyl bones from the Wealden, 96.
- Quantock Hills, Mr. Williams on the granite of, compared with the condition of the Devon and Cornwall granites, 68.
- Rennie, Mr., on a calcareous band in the plastic clay, 260.
- Report, annual, 1846, i.
- Rocken End, Isle of Wight, section from Atherfield to, 55.
- Rocks and scratched boulders of the coal-field of Scotland, 33.
- Rose, Mr., on a whale's ear-bone from the Ipswich Crag, 32.
- Runcorn, Cheshire, Dr. Black on a slab of red sandstone with footsteps at, 65.
- Sandown Bay, Isle of Wight, notes on Iguanodon's bones found there, 91.
- Scaglia of Lycia, 9.
- Scandinavian drift, Sir R. Murchison on, 349.
- Scotland, Mr. Smith (of Jordan Hill) on scratched boulders and rocks from the coal-field of, 33.
- Sedgwick, Prof., on the classification of the fossiliferous slates of Cumberland, &c., 106.
- notice of his labours, 162.
- Sharpe, Mr., and Mr. Morris, on fossils from the Falkland Islands, 274.
- on the geology of North Wales, 283.
- Shells, microscopic, found in the Lias, 30.
- Sigillaria, Mr. Binney on a specimen from Dukinfield, 390.
- its identity with Stigmara, 392.
- Silurian rocks and fossils of Cumberland, Westmoreland, and Lancashire, Prof. Sedgwick on, 106.

INDEX TO THE PROCEEDINGS.

- Silurian rocks of North Wales, Mr. Sharpe on, 288.
- Slates, fossiliferous, of Cumberland, &c., Prof. Sedgwick on the classification of, 106.
- Smith, Mr. (of Jordan Hill), on the scratched boulders and rocks of the Scottish coal-field, 33.
- on the geology of Gibraltar, 41.
- Spirifer antarcticus*, sp. n., 276.
- *Hawkinsii*, sp. n., 276.
- *Orbignii*, sp. n., 276.
- Spratt, Lieut. E., and Prof. E. Forbes on the geology of Lycia, 8.
- St. Helen's, section of Liverpool and Manchester Railway, south of, 24.
- St. Lawrence, Mr. Logan on the packing of the ice in the river, and the occurrence of landslips in its deposits, 422, 426.
- St. Mary's, one of the Azores, on its geology, 39.
- Sternbergia, notes on, by Mr. Dawson, 135; by Mr. Bunbury, 138; by Mr. Dawes, 139.
- Stigmara, on the fossil so called, 134, 136.
- its identity with Sigillaria, 392.
- Stockport, section of coal-measures and new red sandstone near, 18.
- Storton, Mr. Cunningham on the foot-steps of birds in the new red sandstone of, 410.
- Strickland, Mr., on two species of microscopic shells in lias, 30.
- Stutchbury, Mr., on a new species of Plesiosaurus (*P. megacephalus*), 411.
- Subsidence of land in Cutch, 103.
- Superficial detritus of Sweden, Sir R. Murchison on, 349.
- Sweden, Sir R. Murchison on the superficial detritus of, 349.
- Sydney coal-field, Cape Breton, Mr. Brown on erect fossil trees found there, 393.
- Tagart, Mr., on markings in the Hastings sand near Hastings, 267.
- Temperature of the coal period, Mr. Bunbury on, 87.
- Terebratula, Mr. Morris on the subdivision of the genus, 382.
- Tertiary beds of Lycia, account of, 9.
- formations of the Isle of Man, 335.
- Tertiary fossils of Auvergne, 75.
- fossils of the Isle of Man, 346.
- formations of the Isle of Wight, Mr. Prestwich on, 223.
- Theca Forbesi*, sp. n., 314.
- Trees, Mr. Brown on fossil specimens erect in the Sydney coal-field, Cape Breton, 393.
- Tremadoc, Mr. Davis on the geology of the neighbourhood of, 70.
- Tunbridge Wells Railway, on the Wealden strata there, 95, 397.
- section exhibited by, 95.
- Valognes beds, age of, 5.
- Vickary, Capt., geological report on the Beloochistan Hills, 260.
- Wales, North, Mr. Sharpe on the geology of, 283.
- Wealden strata of the Isle of Wight, notes on, by Dr. Mantell, 91.
- in the Tunbridge Wells Railway, notice of, by Dr. Mantell, 95; by Mr. Prestwich and Mr. Morris, 397.
- on supposed birds' bones from, by Prof. Owen, 96.
- supposed fossil birds in, 104.
- Western states of North America, Dr. Dale Owen on the geology of, 433.
- Westmoreland, Prof. Sedgwick on the classification of the fossiliferous slates of, 106.
- Weston, near Runcorn, Dr. Black on footsteps in the new red sandstone of, 65.
- Whale's ear-bone from the Ipswich Crag, 32.
- Whiston, new red sandstone at, 24.
- Whitecliff Bay, Isle of Wight, Mr. Prestwich on, 223.
- Wight, Isle of, section of the greensand at Atherfield, by Dr. Fitton, 55.
- notes on the Wealden strata of, by Dr. Mantell, 91.
- Mr. Prestwich on the tertiary formations of, 223.
- Prof. Owen on an Anoplotheroid tooth found at Binstead, 420.
- Williams, Rev. D., on the granite of Lundy Island and Hestercombe, 68.
- Wisconsin, mines of, 443.
- Wollaston medal, award of, in 1846, 141.
- Zamia Sussexiensis*, n. s., 51.
