THE "MACKINTOSH" BORING AND PROSPECTING TOOL

Patent No. 202342

This is the lightest, cheapest and most compact boring rig for putting down holes in alluvial ground and the like up to the hardness of solid chalk, and taking core samples from all but the hardest rocks. The "Mackintosh" Boring and Prospecting tool weighs but 50 lbs. and can easily be carried and manipulated by one man. With it 20 holes of 20 to 30 ft. can be put down in one day. A core sample of the ground may be brought up from any desired depth, besides which samples of water from any particular stratum may be obtained without fear of contamination by water from other levels.

By the use of this simple tool both time and labour are saved, and heavy equipment is rendered unnecessary.

Please request Catalogue No. 30

We also manufacture

ROCK DRILLS (HAND & CRADLE) for every duty, DRILL SHARPENERS, etc.

CLIMAX ROCK DRILL & ENGINEERING WORKS Ltd.
4 Broad St. Place, London, E.C.2

Works: Carn Brea, Cornwall
CONTENTS

1. S. J. SHAND. The Lavas of Mauritius . . . . 1

3. W. S. BOULTON. The Rocks between the Carboniferous and Trias in the Birmingham District. (Plates V & VI) . 53

The Editor of the Quarterly Journal is directed to make it known to the Public that the Authors alone are responsible for the facts and opinions contained in their respective papers, and for the correctness of their references.

Authors desirous of communicating papers to the Society will be supplied, on application to the Assistant Secretary, with a copy of 'Instructions to Authors', issued by the Council on the recommendation of the Publication Committee.

The Society's Library is open every week-day from 10 o'clock until 5, except on Saturdays, when the hours are from 10 o'clock until 1.

The GEOLOGICAL SOCIETY wishes to announce that a limited amount of space in future editions of this Journal will be available for advertisements.

All communications respecting advertising should be addressed to the Official Agents:

Proceedings of the Geological Society of London, Session 1932–33, including the Anniversary Address of the President . . . . . . . . . i–lxxxvi

The Editor of the Quarterly Journal is directed to make it known to the Public that the Authors alone are responsible for the facts and opinions contained in their respective papers, and for the correctness of their references.

The Council desire, in view of the present financial stringency and of the desirability of publishing in the Quarterly Journal all suitable papers with the least possible delay and at the lowest possible cost, to draw the attention of Fellows and other authors of papers to the necessity of reducing manuscripts and illustrations to the minimum, consistent with clear presentation of the subject-matter. Authors who have in view the submission of papers to the Society should apply for the printed ‘Instructions to Authors’ which the Secretaries will forward, with such other information as may be necessary.

FROM MURBY'S LIST

RECENT PUBLICATIONS

A FRENCH-ENGLISH VOCABULARY IN GEOLOGY AND PHYSICAL GEOGRAPHY. By G. MacDonalD Davies, M.Sc., F.G.S. 6s. net.
A Glossary for English readers of French works in geology, physical geography, mineralogy, petrology, palaeontology, stratigraphy and mining.

UNDERGROUND SOUTH-EASTERN ENGLAND. A Three Dimensional Map of the Weald, London Basin and Chiltern Hills. By L. J. Chubb, M.Sc., F.G.S. In coloured sheets, to be made up. 12s. 6d. net. Binding Equipment, 2s. The Map can now be supplied made up at 35s. net.

NEARLY READY

EARTH-LORE: Geology without Jargon. By Professor S. J. Shand, D.Sc., F.G.S. Illustrated. Ready about March 15. 5s. net.
In a style as interesting as that of a good storyteller, the author discusses not only some of the older problems of geology but some of the newest as well. Even a professed geologist after reading some of the chapters may be surprised to find himself looking at old problems from a new angle.

IN THE PRESS

THE FORM AND PROPERTIES OF CRYSTALS
AN INTRODUCTION TO THE STUDY OF MINERALS AND THE USE OF THE PETROLOGICAL MICROSCOPE

By A. B. DALE
With 122 text-figures, 1 other illustration, and a table of crystals. Crown 8vo. 6s. net

In helping students to master the principles underlying the examination, measurement, and identification of minerals, much difficulty has been experienced in finding a textbook simple enough for those with only an elementary knowledge of physics and mathematics, comprehensive enough to give them most of what they need in a volume of moderate size, and at the same time inexpensive enough to suit their purses. This textbook represents an effort to supply their needs.

Although the book is designed primarily for students of petrology, it is hoped that it may also be found useful to students of chemistry and others to whom crystals are becoming more and more matters of interest and importance.

A DESCRIPTIVE PETROGRAPHY OF THE IGNEOUS ROCKS

Volume II: THE QUARTZ-BEARING ROCKS

By ALBERT JOHANNSSEN
With 120 text-figures and 209 tables. Royal 8vo. 30s. net.

The University of Chicago Press.

This volume defines the rock families and traces the history of the terms. Previously Published. Volume I, Introduction, Textures, Classifications, and Glossary. With 146 illustrations. 25s. net

CAMBRIDGE UNIVERSITY PRESS
CONTENTS

12. S. SMITH. On the Occurrence of Tremadoc Shales in the Tortworth Inlier (Gloucestershire), with Notes on the Fossils by C. J. STUBBLEFIELD. (Plate XXXIV) 357

13. L. and H. K. HAWKES. The Sandfell Laccolith and 'Dome of Elevation'. (Plates XXXV-XXXIX) . 379

14. W. PULFREY. The Iron-Ore Oolites and Pisolites of North Wales (Plate XL) . . . . 401

15. L. G. ANNISS. The Upper Devonian Rocks of the Chudleigh Area (South Devon) (Plate XLI) . . . . 431

17. V. WILSON. The Corallian Rocks of the Howardian Hills (Yorkshire). (Plates XLIX & L) . . . . 480
