„ March	-	-	14*, 28*	„ June	- - - 13, 27*
„ April	-	-	18*		

[Asterisks denote days on which the Council will meet.]

THE "MACKINTOSH" BORING AND PROSPECTING TOOL

Patent No. 202342

This is the lightest, cheapest and most compact boring rig for putting down holes in alluvial ground and the like up to the hardness of solid chalk, and taking core samples from all but the hardest rocks. The "Mackintosh" Boring and Prospecting tool weighs but 50 lbs. and can easily be carried and manipulated by one man. With it 20 holes of 20 to 30 ft. can be put down in

one day. A core sample of the ground may be brought up from any desired depth, besides which samples of water from any particular stratum may be obtained without fear of contamination by water from other levels.

By the use of this simple tool both time and labour are saved, and heavy equipment is rendered unnecessary.

Please request Catalogue No. 30

We also manufacture

**ROCK DRILLS (HAND & CRADLE) for every duty,
DRILL SHARPENERS, etc.**

**CLIMAX ROCK DRILL &
ENGINEERING WORKS Ltd.
4 Broad St. Place, London, E.C.2**

Works: Carn Brea, Cornwall

The Editor of the Quarterly Journal is directed to make it known to the Public that the Authors alone are responsible for the facts and opinions contained in their respective papers, and for the correctness of their references.

The Council desire, in view of the present financial stringency and of the desirability of publishing in the Quarterly Journal all suitable papers with the least possible delay and at the lowest possible cost, to draw the attention of Fellows and other authors of papers to the necessity of reducing manuscripts and illustrations to the minimum, consistent with clear presentation of the subject-matter. Authors who have in view the submission of papers to the Society should apply for the printed 'Instructions to Authors' which the Secretaries will forward, with such other information as may be necessary.
